

Legislative Audit and Fiscal Review Committee
Electronic viewing of audit reports provided to the committee

In conjunction with Legislative Council the State Auditor's Office is conducting a pilot project to reduce paper and printing costs. The next report presented to you regarding information technology security audit vulnerability assessment and penetration testing, will be presented in only an electronic format.

Please share any comments you have on using this format with Legislative Council staff. Based on your feedback we will either expand the use of electronic presentations or continue with the current paper reports.

Thank you.

Donald LaFleur
Information Systems Audit Manager
ND State Auditor's Office
