

# Best Location Units

## Single system, multiple solutions

### BLUtag® {one-piece GPS monitoring device}

- > Only device capable of detecting and reporting GPS jamming and shielding violations
- > Enhanced secondary location technology
- > Battery powers device for 48+ hours on a single charge
- > Receives one GPS location point per minute, an industry standard

BLUtag®

### BLU+™ {dual RF/GPS device}

- > Assign three daily Check-Ins™ outside the enrollee's home, e.g., work, treatment meetings, etc.
- > Battery charge powers device for 7+ days under normal conditions
- > Works with BLUbox™

BLU+™

### BLUband™ {RF transceiver}

- > No programming bracelet to initiate operations
- > Receives messages about RF signal condition
- > Detects and records tampers to strap and case
- > 18-month battery life

BLUband™

### Stalker Alert™ {notification device}

- > Small lightweight device carried by victim
- > Mobile exclusion zone moves with victim 24/7/365
- > Immediate notification for multi-stage mobile exclusion zone violations
- > Notifications sent to multiple recipients

Stalker Alert™

# Best Location Units

## VeriTracks® {cloud-based monitoring software}

- > Quickly view entire caseload and see status of each enrollee
- > View where enrollees spend time with STOP's exclusive Visits™
- > Create zones within zones
- > 200+ existing reports, many support EBP

## BLUhome™ {home-based monitoring unit}

- > Transmits data using cell phone service or the enrollee's landline service
- > Adjustable RF signal reception range
- > Back-up battery powers unit for 3+ days
- > Works with BLUband™ and BLUtag®

## BLUbox™ {optional GPS accessory}

- > Used in areas not conducive to receiving GPS signals
- > Quick installation: plugs into standard electrical outlet
- > Works with BLUtag® and BLU+™

## BLUscan™ {mobile monitoring unit}

- > Monitors up to 16 pieces of equipment at the same time
- > Stores up to 5,000 events in memory
- > Records on a continual or as-needed basis
- > Operates at least three days on a single battery charge

# Alternative Monitoring Services

{ On-site support for an Agency's  
community supervision program }

Satellite Tracking of People LLC (STOP) provides experienced and highly skilled professionals to provide on-site support services. We customize the services to meet the Agency's needs and expectations. Our team can do as much of the work as the Agency needs. Some of the most common services our team provides are:

- > Enrolling and un-enrolling participants into and out of STOP's monitoring application
- > Installing and removing monitoring equipment
- > Providing enrollee orientation
- > Creating and assigning monitoring parameters, such as GPS zones and zone schedules and RF curfews
- > Receiving event notifications, such as violations, and managing them by following the Agency's protocols
- > Communicating with officers and/or enrollees
- > Invoicing enrollees directly and collecting fees
- > Scheduling/approving appointment verification, such as doctor, etc.
- > Verify compliance
- > Generating and submitting reports on the program's statistics and other data to the Agency

## Proven, reliable monitoring system

STOP provides a proven and reliable GPS and RF monitoring system, which we own, maintain and enhance. STOP is the original equipment manufacturer of the GPS and RF monitoring equipment and maintains and repairs it for the life of the contract. All equipment is FCC-certified.

## BENEFITS OF USING OUR ALTERNATIVE MONITORING SERVICES

- > Customizable package of services to meet an agency's evolving needs.
- > Supervising agents can spend more time in the field with enrollees and less time in the office completing paperwork.
- > Eliminate the process of invoicing enrollees and handling money.
- > Receive a rebate when collections exceed the cost of STOP's services.

## TECHNOLOGY-DRIVEN

{ **Innovation:** (1) the introduction of something new;  
(2) a new idea, method or device: novelty }

MERRIAM-WEBSTER.COM

It's easy for a vendor to claim it is innovative, but more difficult to provide substantive proof of it. Satellite Tracking of People LLC (STOP) and its parent company, Securus Technologies LLC, hold a portfolio of more than 130 patents with 40+ patents pending. In addition to our quarterly updates to our hardware and/or software, STOP offers the following "firsts" with our hardware and software as proof of its ability and commitment to meeting customer needs with innovative technology and functionality.

### Hardware: BLUtag®

- > Original one-piece GPS monitoring device now in its 7th generation using 3G cellular phone networks
- > A single charge powers BLUtag for 48+ hours without a home-based receiver unit or receiving GPS signals less than once per minute
- > Multiple charging options: standard, automobile, mobile and multi-device
- > First device to detect and report jamming the GPS signal and shielding BLUtag from receiving GPS signals
- > Uses a high-sensitivity 48-channel GPS receiver with Wide Area Augmentation System
- > Secondary location technology uses cellular phone tower data in a more accurate and strategic approach

BLUtag®

### Software: VeriTracks®

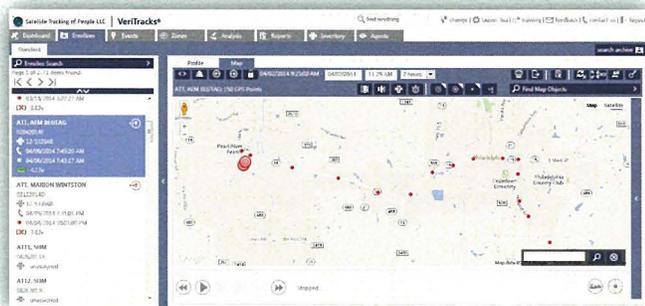

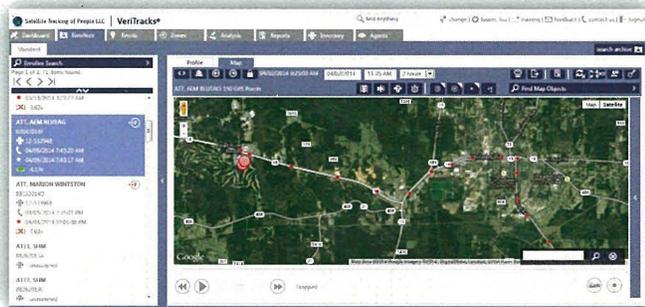

- > Secure web-based monitoring application accessible using any computer, laptop, smart phone or tablet
- > Robust mapping powered with Google Maps™
- > View enrollee Visits on a map as a red bull's eye
- > Custom reports that meet the evidence-based practices of your agency
- > Online inventory lists current status of every piece of equipment assigned to your program

continued >

## Customer Focused

In addition to focusing on technology, we are also a Company focused on our customers and exceeding their expectations with services and support. Below are some highlights of our customer focus.

- > Maintained a 97 percent customer retention rate since operations began in early 2005
- > STOP's Monitoring Center service: our employees follow your customized protocols to manage events in a consistent streamlined manner
- > Proactive Customer Assistance, a value-added service, enhances the initial training course for new customers
- > Access to our three-tier technical support service 24 hours a day, 365 days per year
- > Additional optional field services: equipment installation/removal, case management and enrollee payments

VeriTracks®

## Long-term Vision

STOP consistently focuses on the long-term success of our customers, the enrollees in our customer's supervision programs and our Company. This vision is enhanced with our deep understanding of government agency complexities: our customers' operations link with other agencies and legislative initiatives can affect our customers' operations. Here are some of our long-term customers using our system.

- > U.S. Pretrial Services Agency and U.S. Probation
- > Court Services and Offender Supervision Agency, Washington D.C.
- > New York Department of Corrections and Community Supervision
- > Tennessee Department of Children's Services
- > Dismas Charities
- > California Department of Corrections and Rehabilitation
- > Georgia Department of Corrections
- > Tennessee Department of Corrections
- > Texas Department of Juvenile Justice

*Satellite Tracking of People LLC puts customers and their needs first. We build long-term partnerships with customers so we can provide the best tools to supervising officers to help ensure a high level of enrollee compliance and community safety.*
