

NORTH DAKOTA DEPARTMENT OF **PUBLIC INSTRUCTION**

Assessment Survey Data Report

Revised November 2015

September 2015

Kirsten Baesler
State Superintendent
Department of Public Instruction
600 East Boulevard Avenue #201
Bismarck, ND 58505-0440
www.nd.gov/dpi

Overview

In preparation for the 2015 Interim Legislative Committee, the North Dakota Department of Public Instruction (NDDPI) was tasked with collecting statewide data reflecting the various tests given to students throughout grades K-12. This data set is not currently collected by the NDDPI, therefore a unique survey of all districts was developed and administered.

On August 24, 2015, North Dakota school district administrators received the following correspondence:

Dear Administrators,

As part of a legislative study on assessments in the state of North Dakota, the Department of Public Instruction (NDDPI) is asking each district to complete this survey of information on standardized assessments in North Dakota schools. Survey results will be compiled and made available to the North Dakota Interim Legislative Committee.

The survey is intended to give a better understanding of the standardized assessments given to all students at a grade level within a district.

I understand the school year is just beginning and you are all very busy, but I kindly ask you to take a few minutes to complete this survey. Thank you, and have a great school year.

Sincerely,
Kirsten Baesler
State Superintendent

The instructions of the survey directed districts to complete only one survey per school district.

The survey was pre-populated with the following known assessments:

- AIMSweb
- ACT Aspire
- DIBELS
- STAR
- MAP
- Smarter Balanced Interim Assessment
- PSAT
- SAT

Excluded from the individual district surveys were federal and state administered assessments (e.g., North Dakota State Assessment, NAEP, and Grade 11 ACT/WorkKeys). The NDDPI has statewide records of these assessments. The purpose of the survey was to compile additional information on assessments that are selected and administered by the local school districts.

The survey was to exclude any regular classroom testing that is specific to a teacher and classroom (e.g., weekly spelling tests, end of unit tests) or those used only for specific populations of students and not administered to all students in a grade (e.g., ACCESS for ELLs).

Data regarding the interim assessment required in state law (NDCC 15.1-21-17) was not specifically collected through this survey. Interim assessment data was captured within the district administered data as it is a locally administered, locally determined test for grades 2-10.

Districts were asked to list any additional assessments administered by the district that were not included on the pre-populated list by using the "Other" function within the survey.

For each assessment, districts were asked the following questions.

- Name of assessment
- Grades administered
- Frequency of administration
- Length of assessment
- When assessment is administered
- Purpose of assessment

In the end, 148 out of 179 districts, or 83%, responded to the survey.

The data for state and federal administered assessments was added to the survey data of locally administered assessments to compile these reports reflecting overall North Dakota statewide testing.

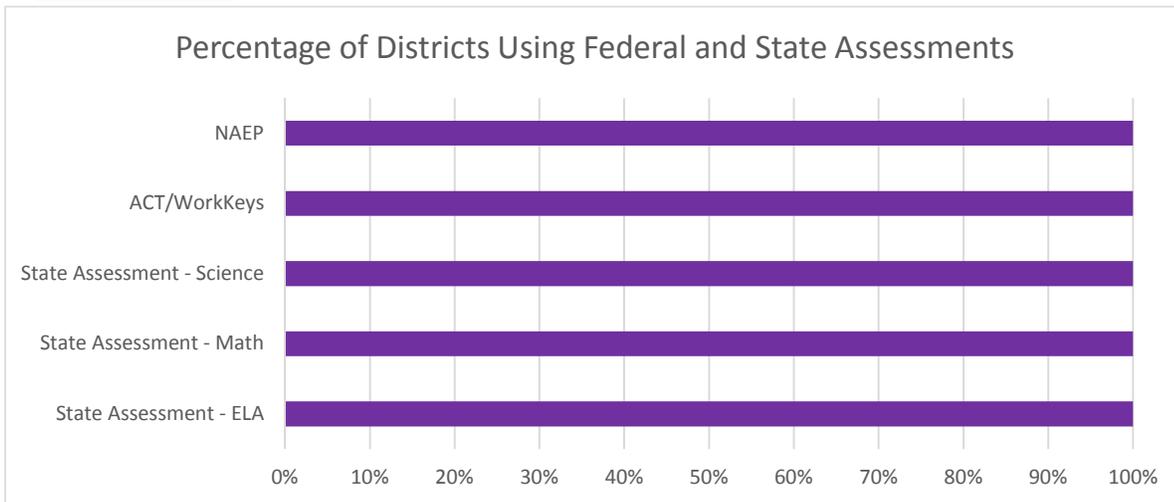

This report provides a summary of the statewide data as well as individual district level reports for each responding district.

Districts that have not submitted survey data have been excluded from this report. Should a district wish to have their data added or to make a revision to the data reported, please contact Rob Bauer, Assistant Director of Assessment, at rgbauer@nd.gov or (701) 328-2224.

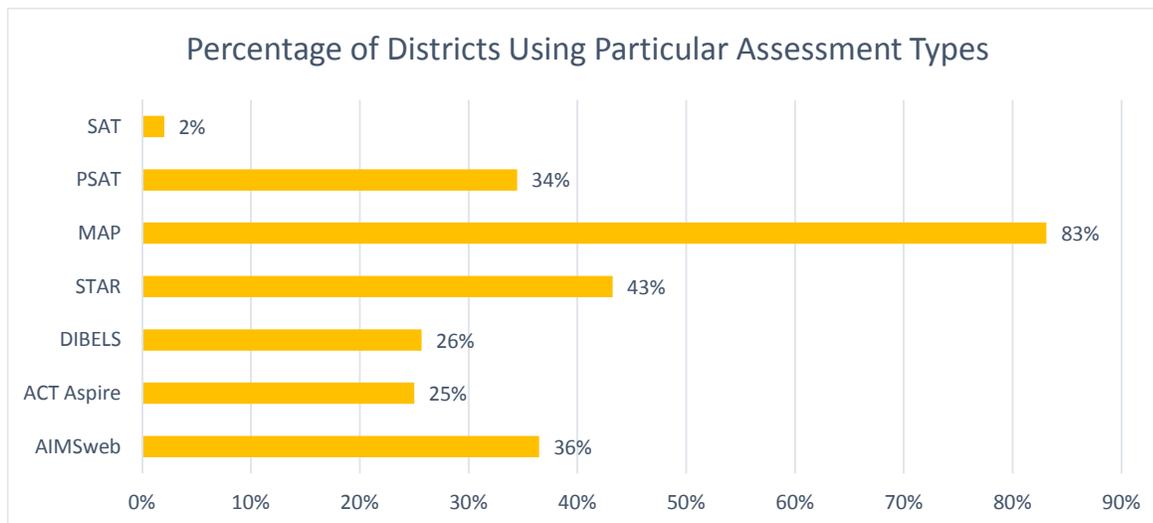

State of North Dakota Assessment Survey Data Report

Types of Tests Administered

Federal and State - The federal and state test administration data is maintained within NDDPI.

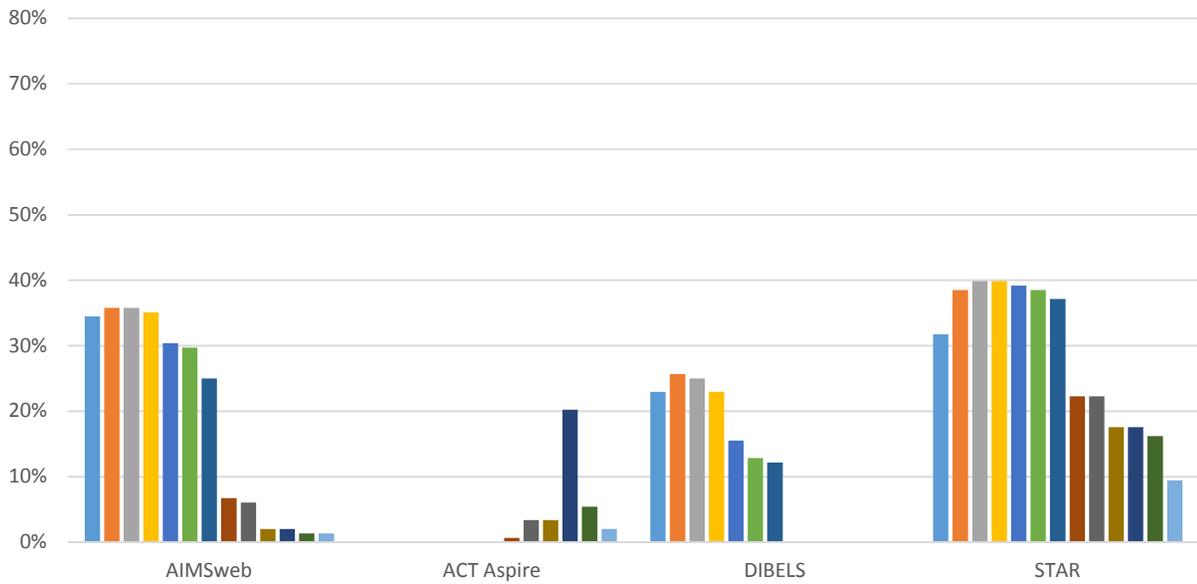

District - According to information supplied by 145 North Dakota school districts, the following district assessments are administered annually:

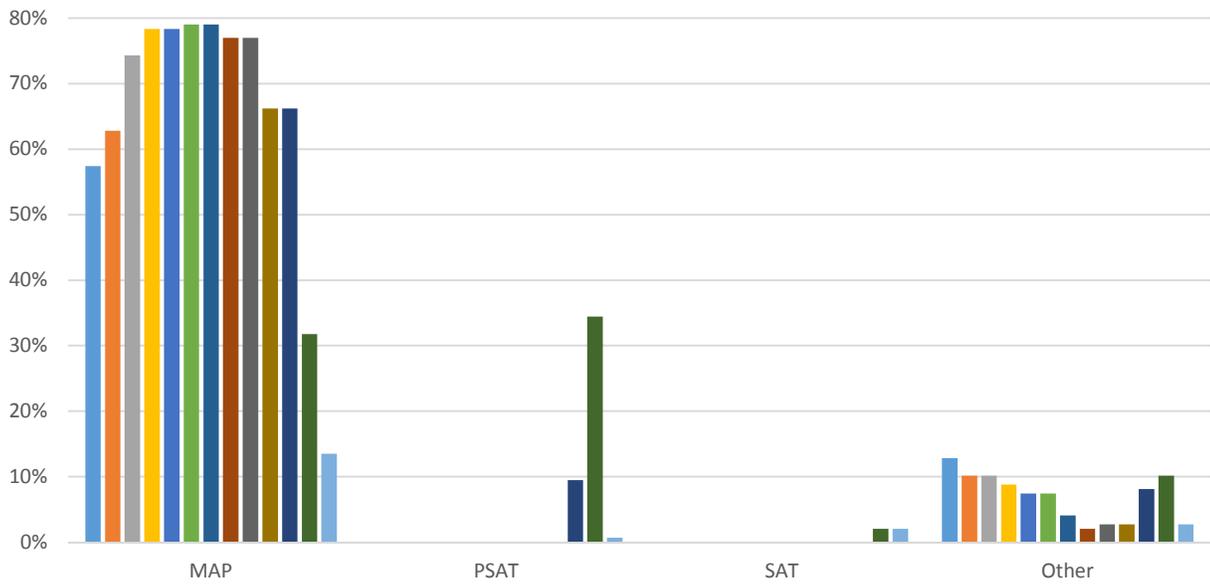

District Usage of Assessment Types by Grade

■ K ■ 1 ■ 2 ■ 3 ■ 4 ■ 5 ■ 6 ■ 7 ■ 8 ■ 9 ■ 10 ■ 11 ■ 12

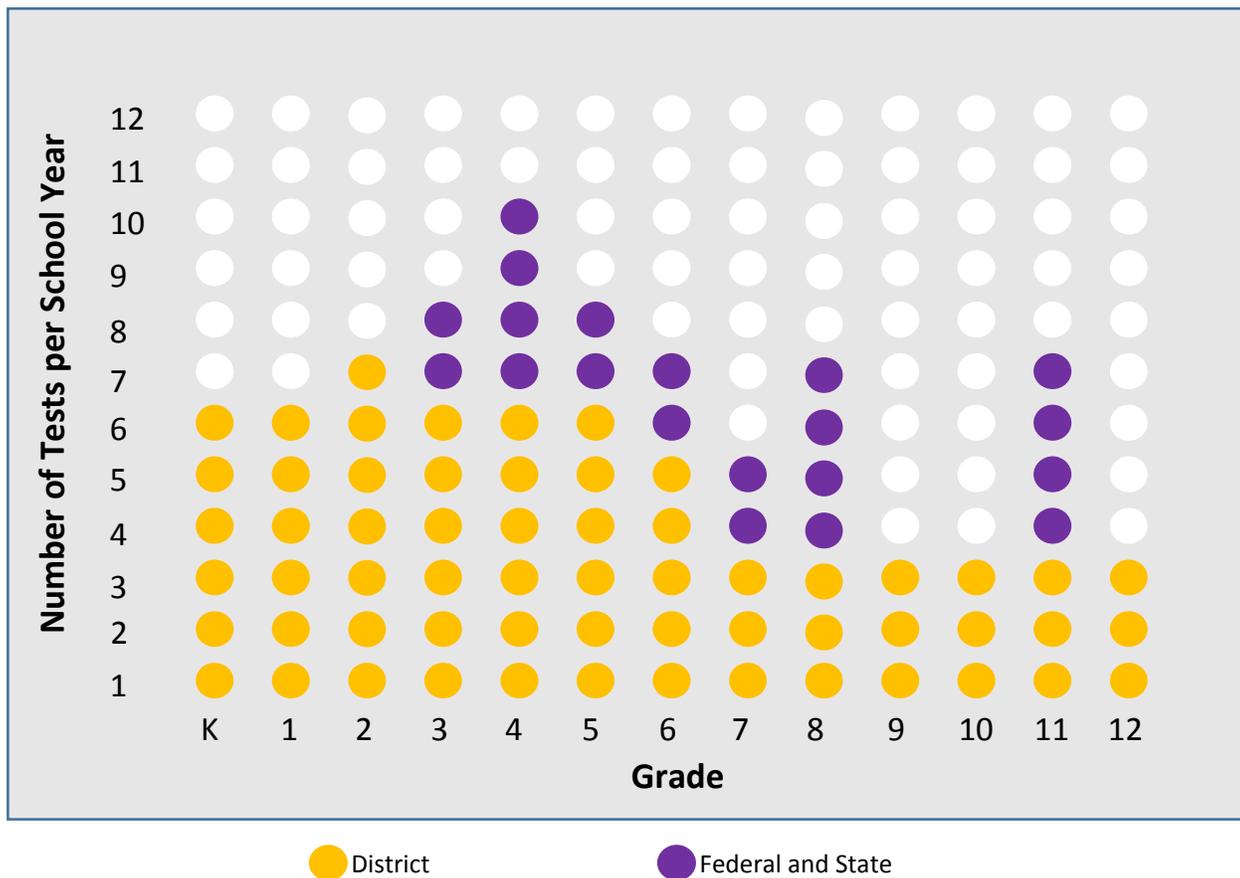

District Usage of Assessment Types by Grade

■ K ■ 1 ■ 2 ■ 3 ■ 4 ■ 5 ■ 6 ■ 7 ■ 8 ■ 9 ■ 10 ■ 11 ■ 12

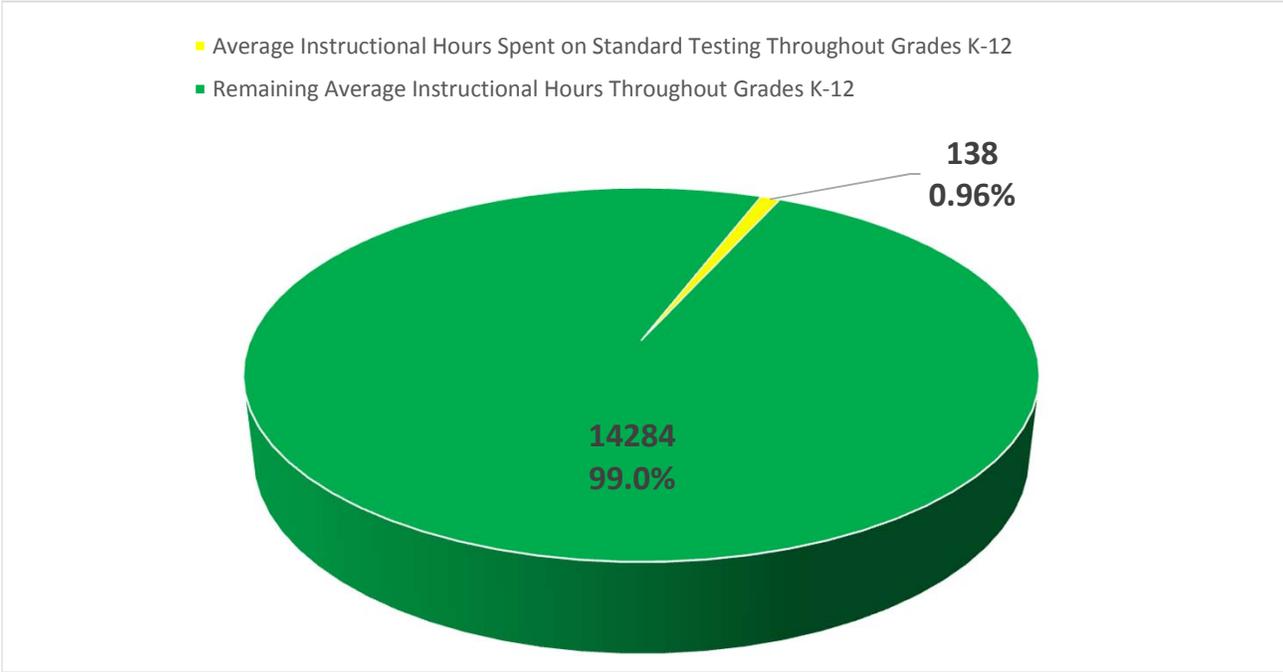

Number of Test Administrations Per Grade Level

Based on information provided by districts, this chart outlines the statewide average number of tests administered each year to each grade level. Each dot represents one test administration.

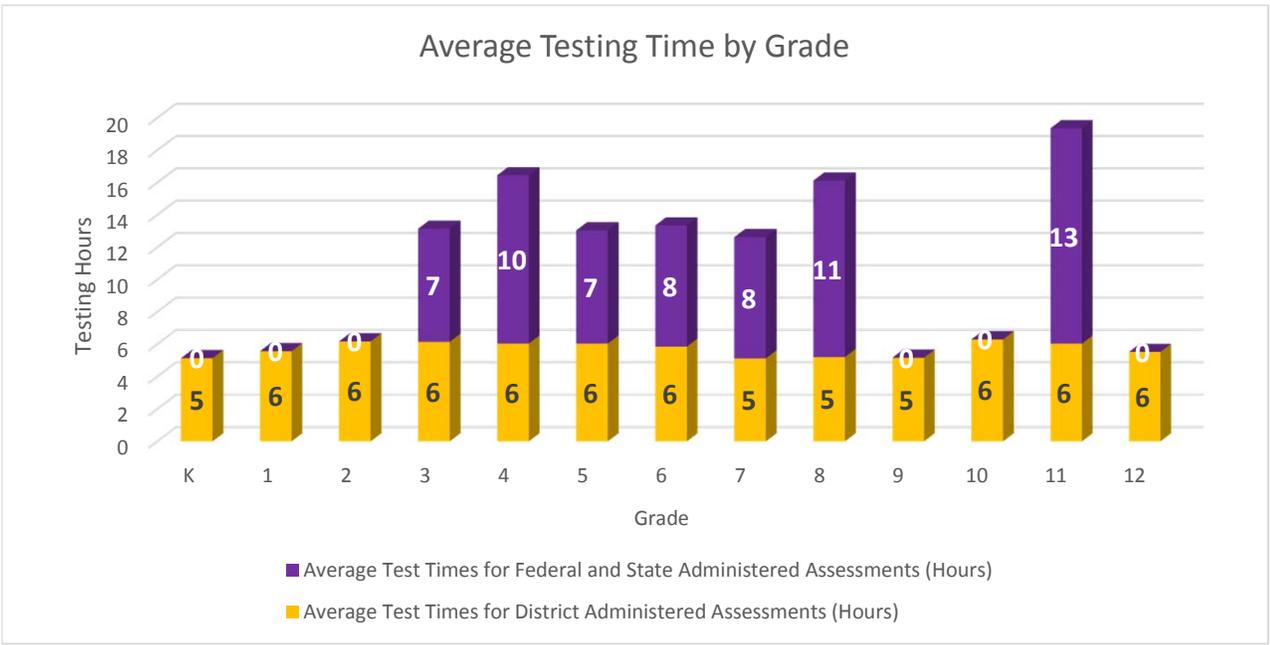

Please note, the interim assessment required by state law (NDCC 15.1-21-17) is reflected within the district administered data as this is a locally determined, locally administered test for grades 2-10.

Percentage of Educational Career (K-12) Students Spend on Administered Assessments (Hours)

Time (Hours) Spent Administering Standard Assessments Per Grade Level

Based on information provided by districts, this graph outlines the total length of assessment administration for each of the assessment types within each grade:

Please note, the interim assessment required by state law (NDCC 15.1-21-17) is reflected within the district administered data as this is a locally determined, locally administered test for grades 2-10.

District: Alexander 2

Assessment Survey Data Report

Types of Tests Administered

According to information supplied by the district, the following federal, state, and district assessments are administered annually to all students across a particular grade level:
