*These companies were originally certified for the seed capital investment tax credit program under N.D.C.C. ch. 57-38.5. Because of legislative changes made in 2005 they were automatically switched over to the agricultural commodity processing facility investment tax credit program. They were grandfathered in, do not have to become recertified and do not count toward the maximum number of companies that may be certified under N.D.C.C. ch. 57-38.6 after 2004
