RACHAEL DRUCKHAMMER, Senior Research Associate

Key Challenges in North Dakota

PRISON AND JAIL POPULATION GROWTH DRIVING COST. The statewide jail population increased 83 percent between 2006 and 2013. The prison population, up 32 percent between 2005 and 2015, is projected to increase 75 percent by 2025. Accommodating the increase will require hundreds of millions of dollars in new spending unless action is taken to avert the growth.

GROWING IMPACT OF SUBSTANCE USE. Drug use presents a growing challenge for North Dakota's criminal justice system. Between 2011 and 2014, there was a 148 percent increase in drug-related felony sentence events.

HIGH RATES OF FAILURE ON COMMUNITY SUPERVISION. Probation and parole officers reported that three quarters of their caseloads needed some form of drug or alcohol treatment. Most stakeholders see substance use as the primary causes of violations and revocations. Probation revocations alone cost the state an estimated \$12.5 million each year.

BEHAVIORAL HEALTH SYSTEM OVERWHELMED. Rural and urban communities alike lack the trained workforce and services necessary to meet the needs of their residents.

Justice reinvestment goals explored in today's presentations

Avoid hundreds of millions in corrections spending

Improve services and resources for victims of crime

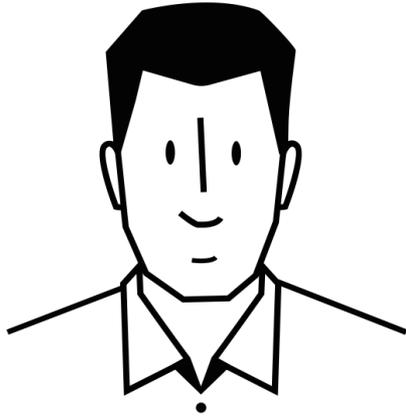

Reduce recidivism with stronger supervision

Expand access to high quality programs and treatment

This presentation contains four behavioral health policy options

1. Increase healthcare enrollment for criminal justice system involved individuals.
2. Develop and fund an enhanced array of community interventions for higher risk and needs individuals.
3. Establish and fund policies to ensure an adequate network of community behavioral health practitioners throughout the state.
4. Create an alternative sentencing option delivering treatment and supervision.

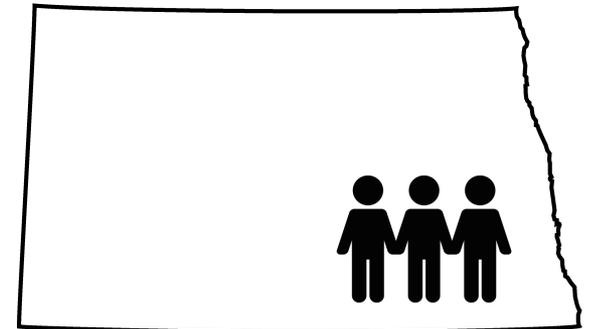

Access to behavioral health treatment not only impacts individual lives but also every community around the state

Meet John Smith. John was sentenced to state prison and was recently released. He received treatment behind the walls but lacks health insurance and cannot afford to continue his medication back in his community. Without medications and counseling supports, John begins to decompensate and his behavior comes to the attention of police.

Across North Dakota the availability of behavioral health treatment is not keeping pace with the level of need. Incarceration, despite its negative effects on individuals, is sometimes viewed as the only way to connect people to services.

- **6th highest rates of alcohol and drugs abuse in the US**
- **43rd in behavioral health workforce availability**
- **Enrollment in substance abuse treatment decreased 15% (2009-13)**

POLICY
OPTION #1

Increase healthcare enrollment for criminal justice system
involved individuals

- 1A. Ensure use of a **comprehensive process** to screen and enroll prison and supervised populations in healthcare.
- 1B. Require Medicaid to **suspend benefits** rather than terminate during incarceration.
- 1C. Require Medicaid to work with DOCR to **facilitate Medicaid Administrative Claiming** to reimburse DOCR for all eligible activities.

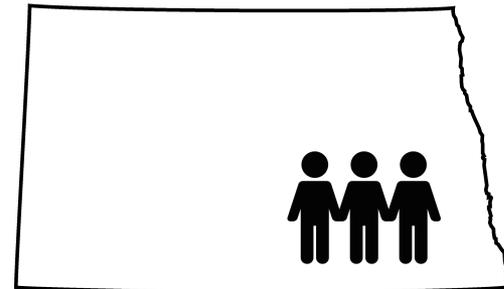

Key reasons to increase healthcare enrollment for criminal justice system involved individuals

Improve John's health and stability and **reduce recidivism** by ensuring funding for needed healthcare services

Improve public safety by addressing the behavioral health needs of individuals in the criminal justice system

Maximize state investments by fully leveraging federal share of healthcare costs

Suspending rather than terminating Medicaid benefits during incarceration can expedite reinstatement of benefits after release

Current Practice: TERMINATION

John enters prison. If he receives Medicaid, his **benefits are terminated.**

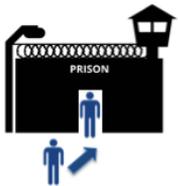

John leaves prison. He must begin the **process of reinstating Medicaid** on his own.

Months pass before John's Medicaid benefits are reinstated.

Proposed Practice: SUSPENSION

John enters prison and is screened for Medicaid.

If John has Medicaid, his **benefits are suspended.**

If he does not have Medicaid, he is **enrolled.**

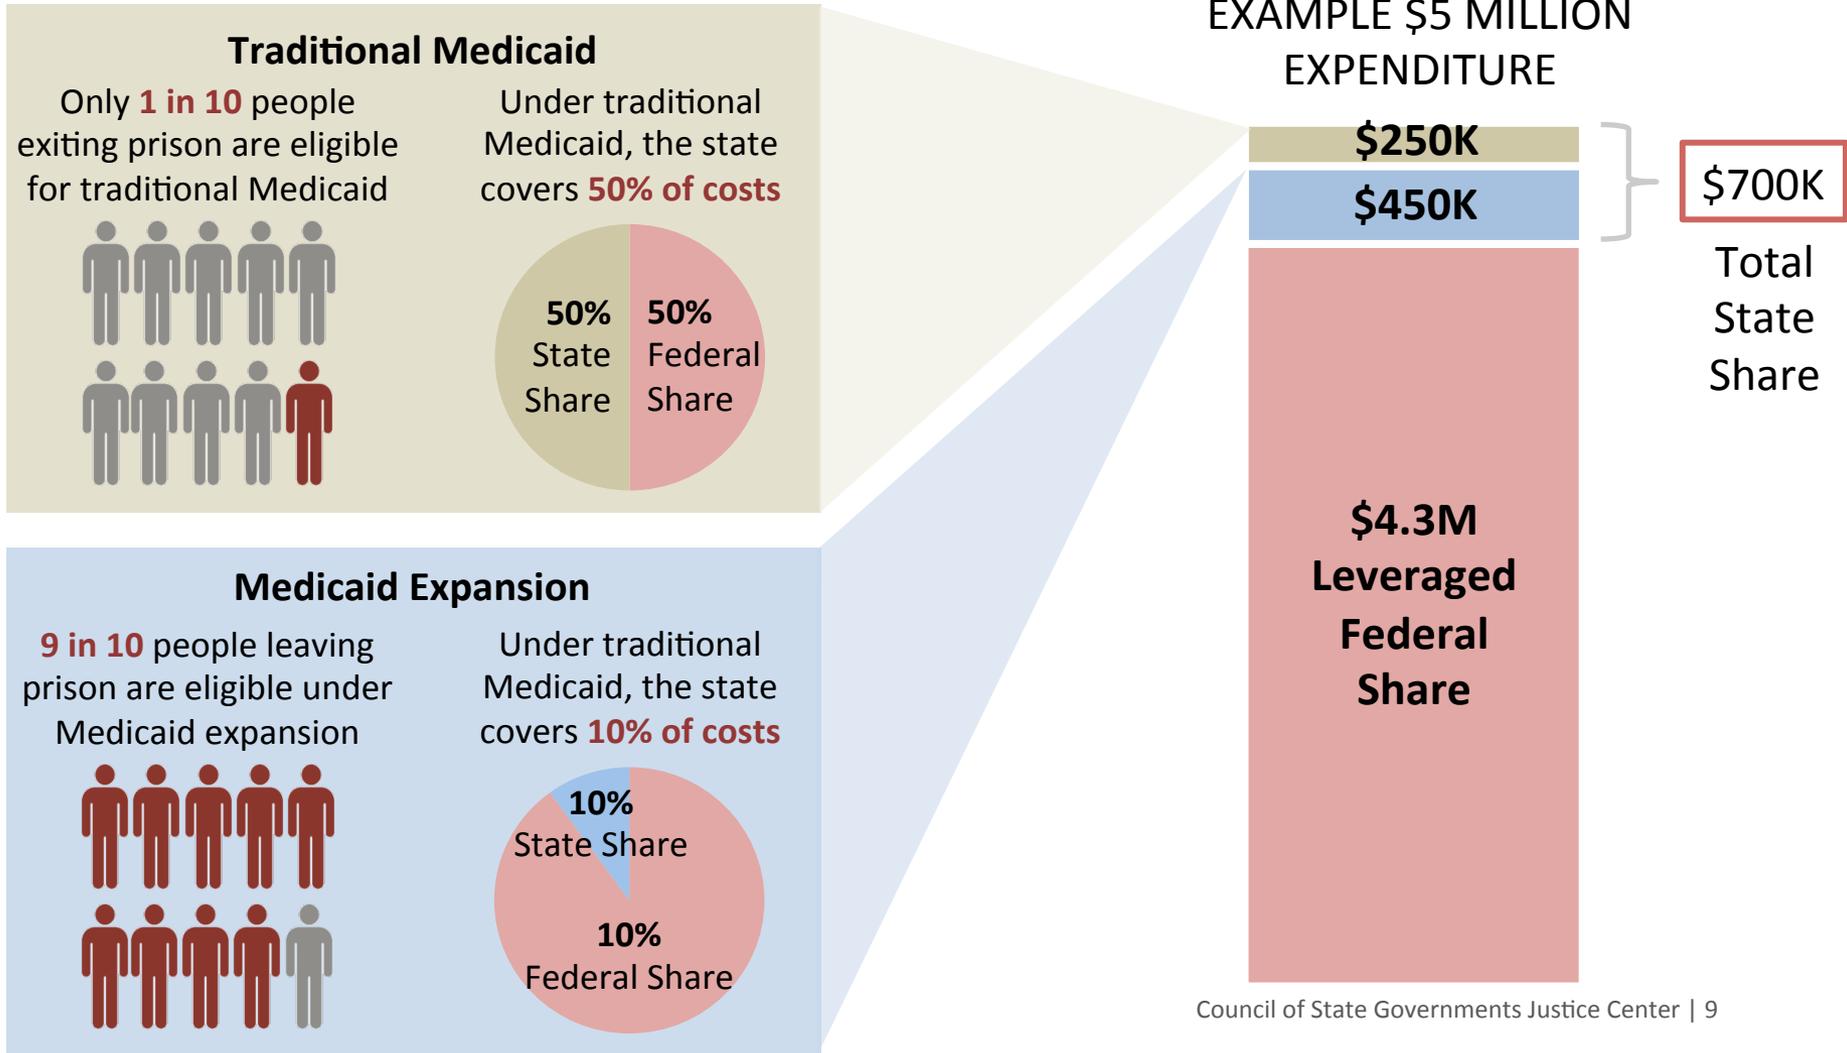

John leaves prison with healthcare benefits already initiated.

It is only **days** before John's benefits are reinstated.

Medicaid Expansion enhances coverage for more people and leverages 90 federal dollars for every 1 dollar spent

North Dakota can also leverage federal funds to offset the cost of enrollment activities through Medicaid Administrative Claiming (MAC)

MAC can
pay up to
50%
for these
activities

Examples of Reimbursable Activities

Outreach

Application assistance

Staff development and training

Create an array of community interventions for higher risk and needs individuals

- 2A.** Require DHS and DOCR to develop and promulgate standards for the provision of an array of community behavioral health services tailored for moderate and high risk offenders with serious behavioral health disorders.
- 2B.** Require Medicaid to create enhanced rates with performance-based incentives to adequately support enhanced service provision.
- 2C.** Increase access to risk reducing cognitive-behavioral interventions for offenders on probation and parole.

POLICY
OPTION #2

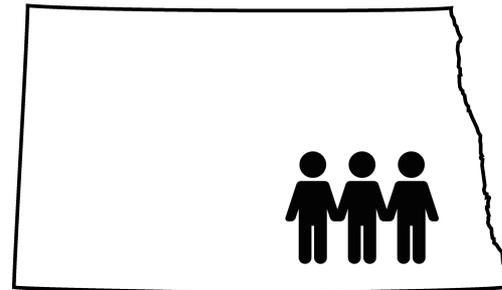

Key reasons to expand access to community based treatment for criminal justice system involved populations

Improve the public health outcomes for John by ensuring availability of an adequate array of treatment services in the community

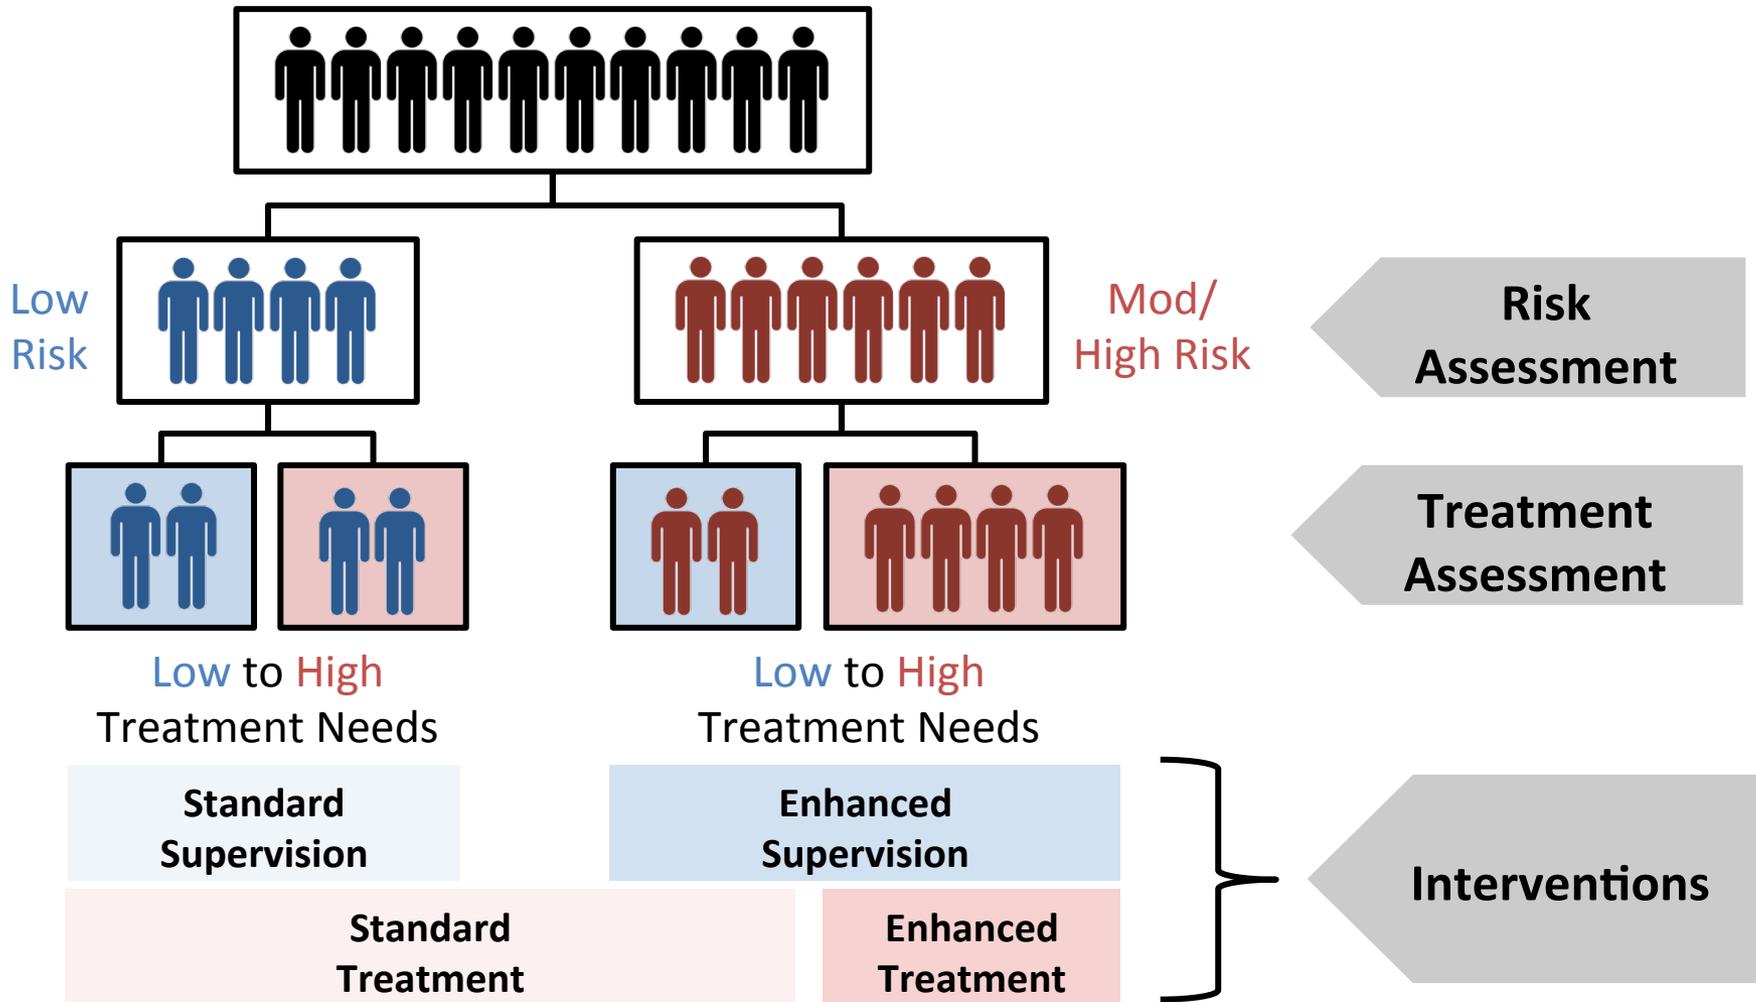

Improve public safety by addressing the behavioral health needs of individuals in the criminal justice system

Reduce system capacity pressures and costs associated with incarceration

**POLICY
OPTION #2**

Expand access to community based treatment for criminal justice system involved populations

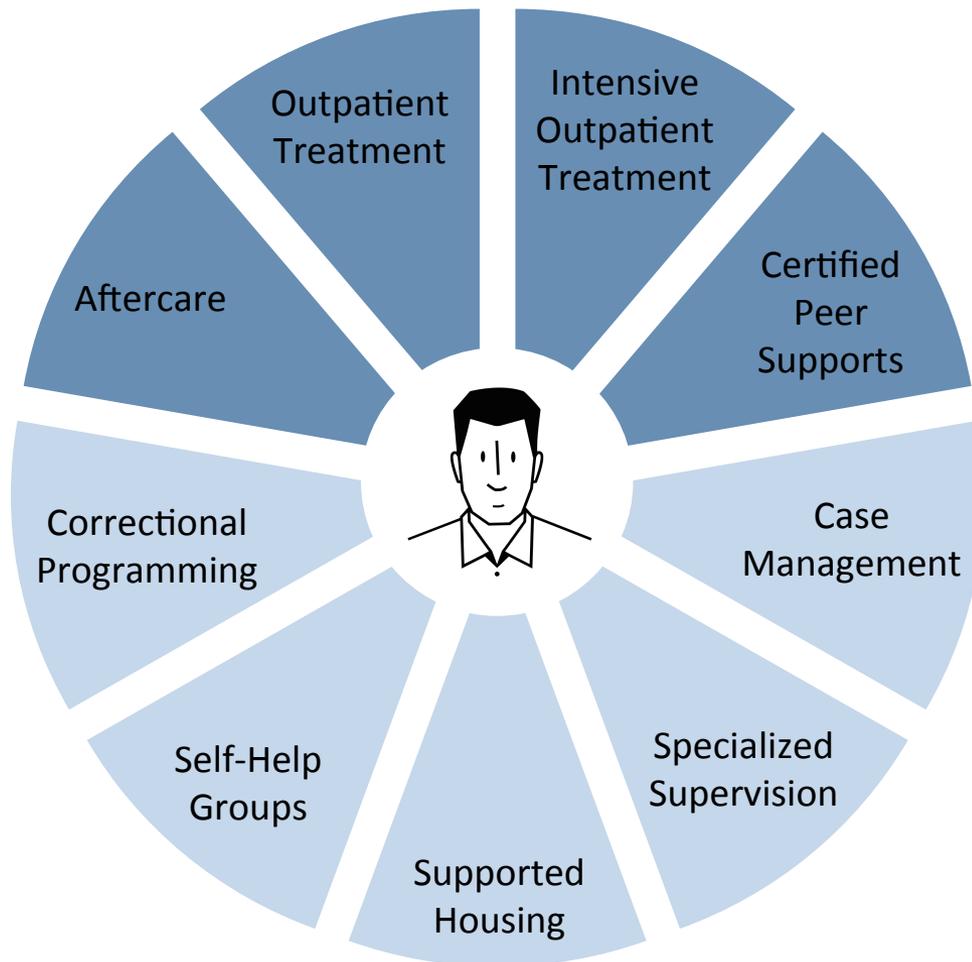

POLICY OPTION #2

Create an array of integrated community interventions for higher risk and needs individuals

EFFECTIVE ARRAY OF CARE

■ Medicaid Reimbursable ■ Not Medicaid Reimbursable

KEY FEATURES

- Team-based case planning
- Close collaboration
- Coordinated services
- Efficient information sharing
- Proactive engagement
- Continuing care strategies
- Data driven shared outcomes
- Manage level of care

VALUE BASED INCENTIVES

- Enhanced services linked to enhanced rates
- Enhanced rates linked to provider performance

Establish and fund specialized positions to provide needed community supports and services

- 3A.** Require DHS and DOCR to collaborate in establishing **training and certification processes** for both mental health and substance abuse peer support specialist positions to work in criminal justice settings.
- 3B.** Require Medicaid to recognize peer support specialists as a **Medicaid billable service**.
- 3C.** Require DHS and DOCR to establish the parameters of a **Community Engagement Specialist position** and determine how many positions are needed to meet current and future system needs. Legislature to adequately fund.
- 3D.** Require and fund DOCR in expanding its use of **specialized community supervision agents** to manage and improve outcomes for higher risk individuals with serious behavioral health disorders.

POLICY
OPTION #3

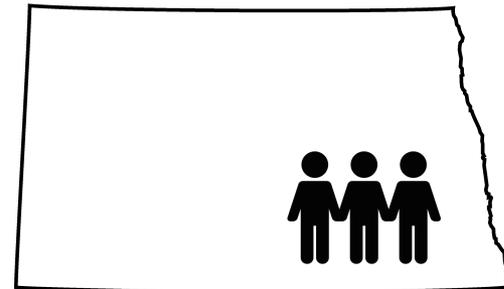

Key reasons to establish and fund specialized positions to provide needed community supports and services

Assure John's **access to recovery supports** that are integrated with criminal justice systems

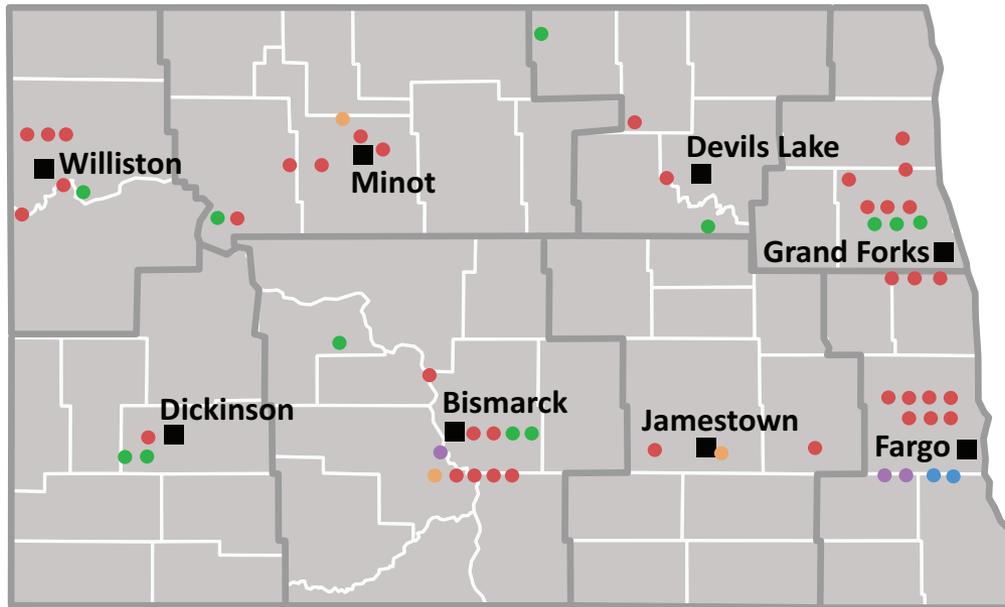

Provides **entry level** paid **positions** for people who are interested in making a career in behavioral health

Help address the extreme behavioral health **workforce shortage**

North Dakota faces significant workforce shortages at all levels of the behavioral health profession

LOCATION AND NUMBER OF SUBSTANCE ABUSE CLINICIANS*

- 1 Clinician
- 2-3 Clinicians
- 4-5 Clinician
- 6-9 Clinicians
- 10+ Clinicians

Key Recruitment and Retention Barriers**

- Compensation
- Work schedule
- Housing availability and quality
- Cultural activities
- Spousal employment
- Continuing education

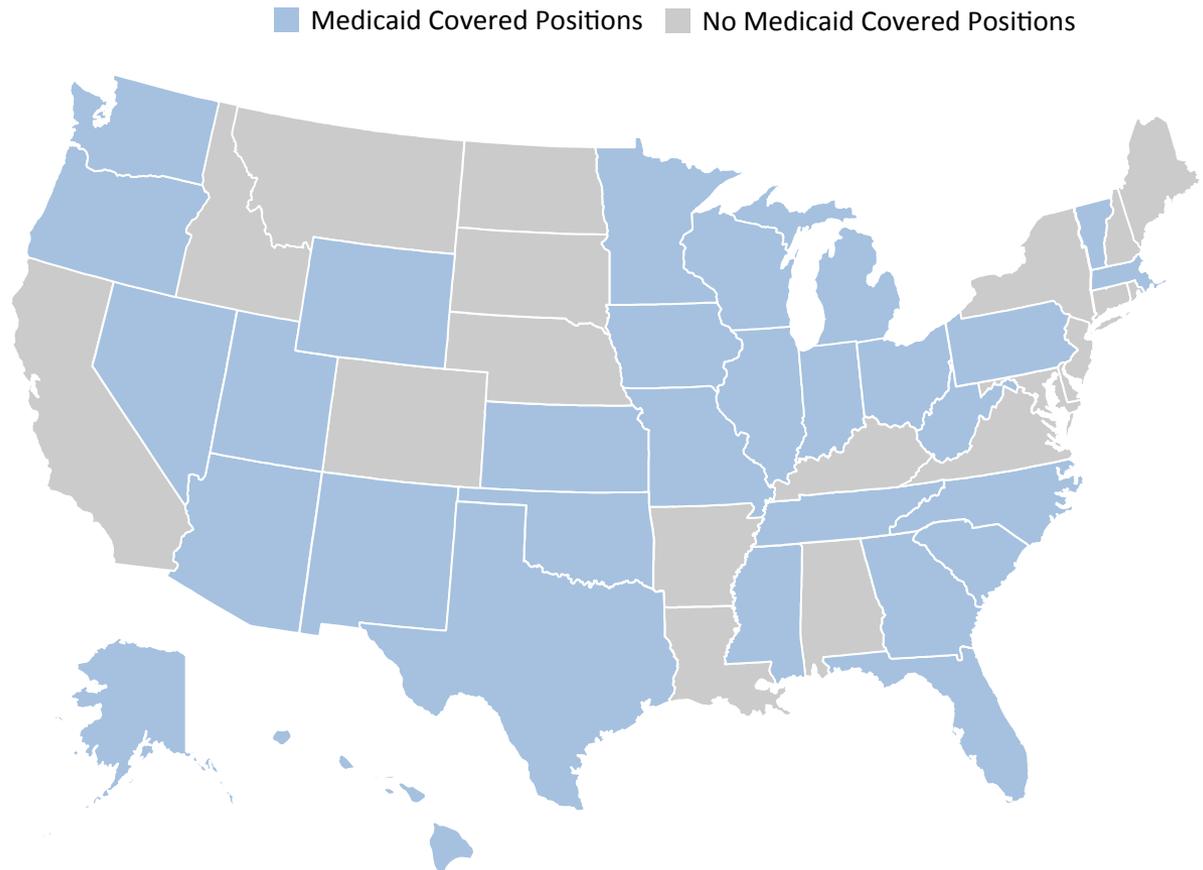

*Substance Use Disorder System in North Dakota, DHS

**http://www.med.und.edu/about-us/_files/docs/third-biennial-report.pdf

POLICY
OPTION #3

Many states have already taken advantage of Medicaid to pay for can be peer specialist positions

In 31 states, Medicaid pays for licensed peer specialist, counselors recovering from severe mental illness or substance abuse addiction who are trained to help others with similar conditions

Create an alternative sentencing option delivering treatment and supervision

- 4A. Establish a **new sentencing option** for higher risk offenders who have serious behavioral health disorders.
- 4B. Establish **eligibility criteria** with exceptions for violent and dangerous individuals.
- 4C. Require participation in **community behavioral health services**.

POLICY
OPTION #4

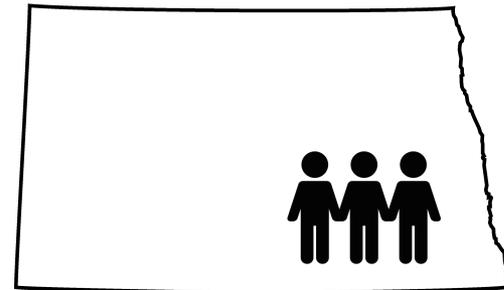

Key reasons to create alternative sentencing option to treatment and supervision for target population

Help John avoid incarceration by **providing tailored behavioral health services** along with structured and supportive accountability

Reserve incarceration for the most serious offenders

Improve effectiveness and ensures accountability by **pairing treatment with community supervision**

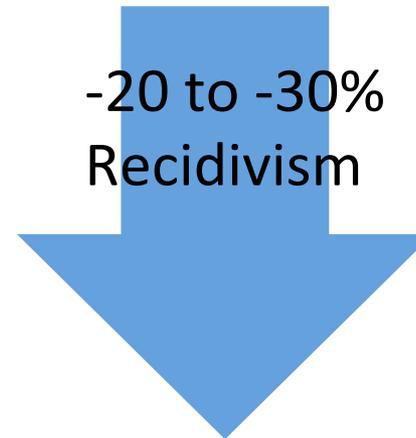

**POLICY
OPTION #4**

Interventions offered in the community are more effective at changing behavior than those offered in prison

**PROGRAMMING
DURING INCARCERATION**

**PROGRAMMING
IN THE COMMUNITY**

- Required:
- Assessment
 - High quality programs and treatment
 - Transition planning

- Assessment
- High quality programs and treatment
- Effective supervision

POLICY OPTION #4

Potential cost savings with a treatment + supervision sentencing option

AVERAGE TREATMENT AND SUPERVISION COSTS

PROBATION

6 MONTHS

X

=

\$763.20
(**\$4.24** daily cost for 180 days)

TREATMENT

6 MONTHS

X

=

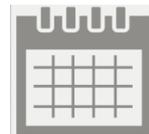

\$810 cost to the state
\$4,590 paid through Medicaid
(based on average costs of blended levels of treatment)

COMMUNITY
ENGAGEMENT
SPECIALIST

6 MONTHS

X

=

\$1,000
(based on **\$50K/year** salary and 25 person caseload)

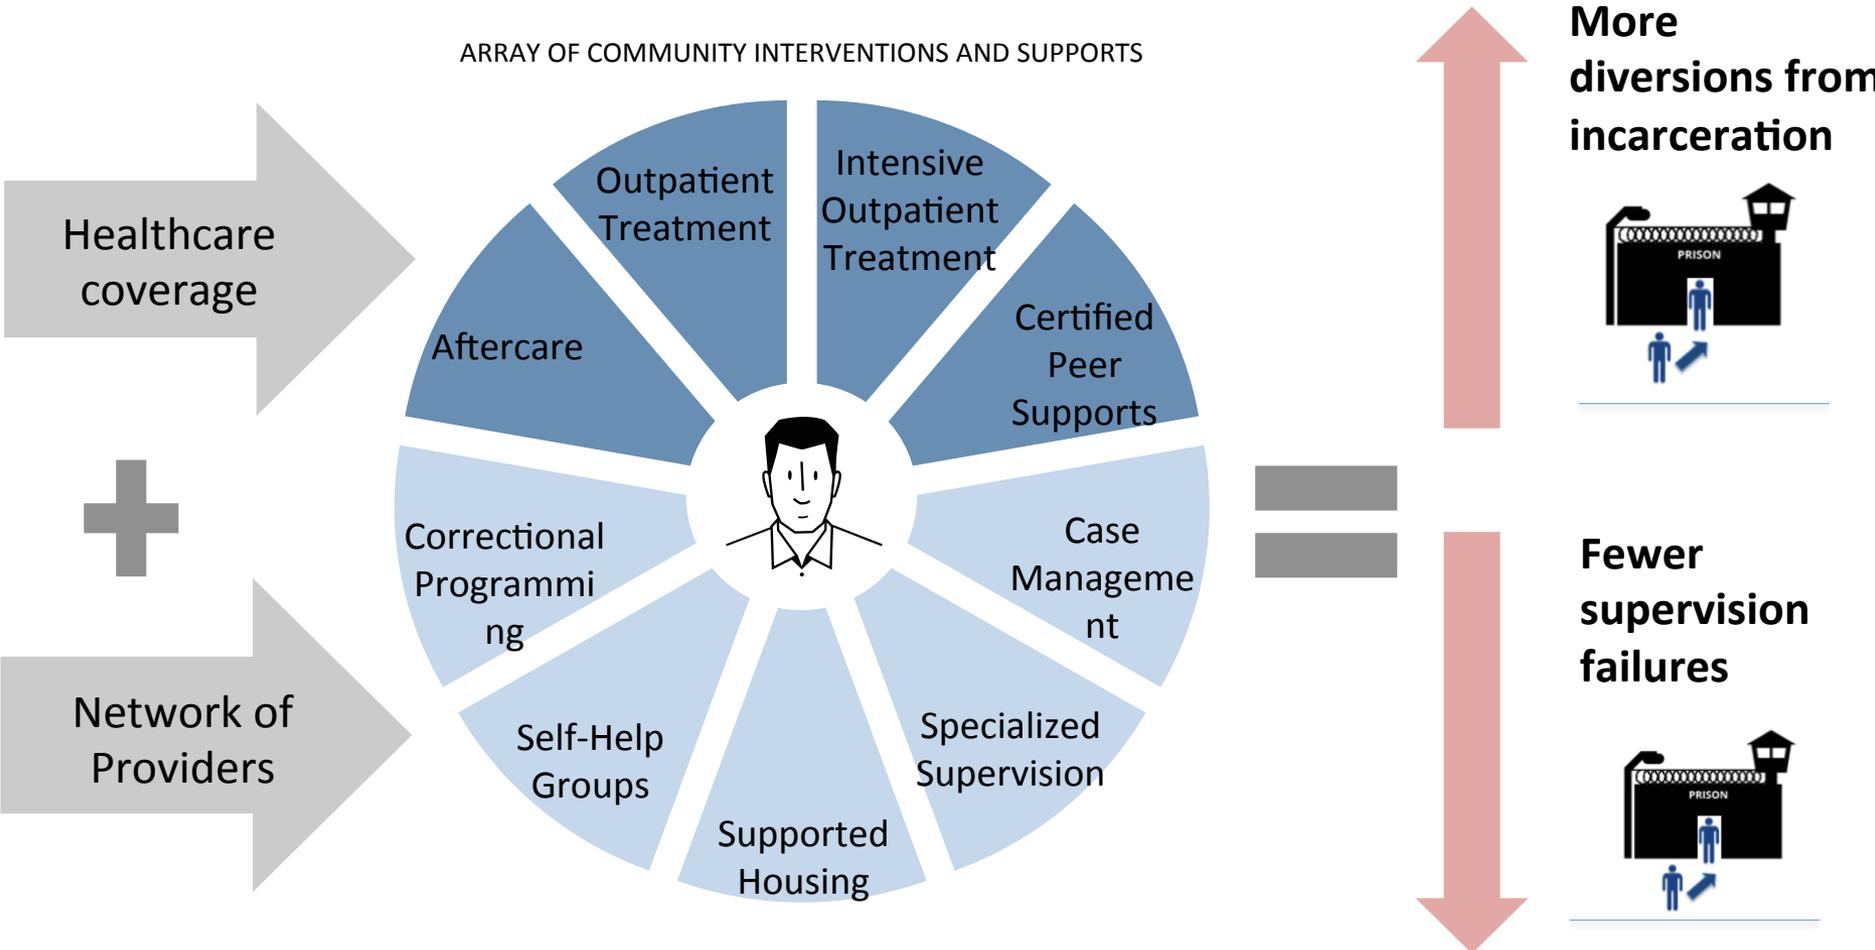

State costs for 6 months of incarceration in prison
=
\$20,446

State costs for 6 months supervision + treatment
=
\$2,573.20

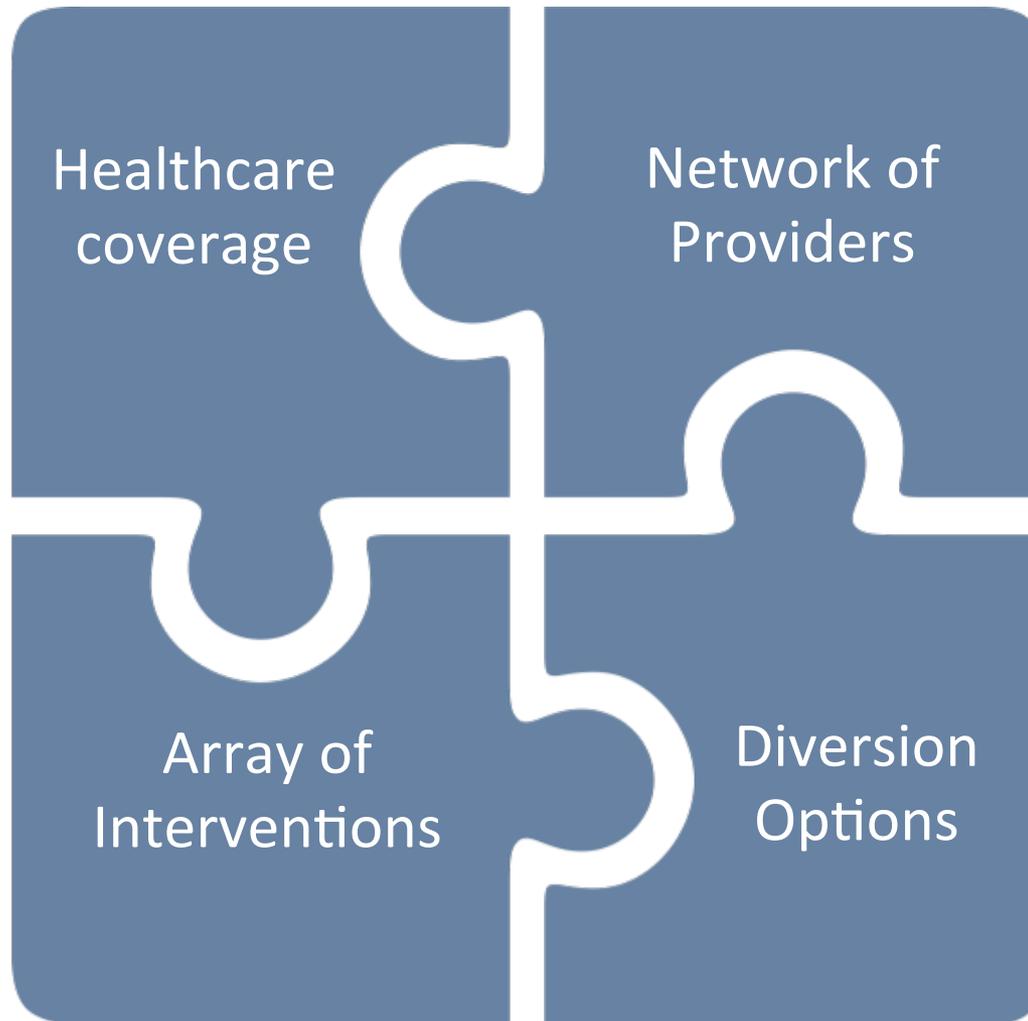

+ **\$4,590** leveraged through Medicaid

Total Savings:
\$17,872.80

The proposed policies create a “package” of changes that work together to decrease incarceration and improve behavioral health outcomes for individuals

The core tenants of justice reinvestment are interconnected and build upon one another to create an impact

Additional Considerations

- Adopt consistent approaches to services and supports across all of the Human Services Centers.
- Support committee work to assess behavioral health board credentialing processes and standards.
- Create paid career ladders, and eliminate requirements that lead to unpaid post-degree internships where feasible .
- Streamline interstate transfers.
- Expand existing rural healthcare workforce initiatives to include behavioral health workers.
- Review emergency room refusals to serve justice-involved populations.
- Encourage utilization of behavioral health assessments across agencies (uniform standards of content and quality).

Thank You
