**Notes to Table 1 (2006-2010 tax years):**

<sup>1</sup> The total number of individual income tax returns filed for each of the years reported in this table are as follows: 2006--343,107; 2007--355,311; 2008--362,148; 2009--363,201; 2010--383,383.

<sup>2</sup> Incentives 1 and 8 (highlighted in yellow) are deductions from income, which reduce the income subject to tax. The dollar amounts shown are the estimated tax reductions, which were determined by multiplying the total deduction amounts claimed on the returns by an average tax rate. For Incentive 1, the deduction amounts claimed on the returns are as follows: 2006--\$11,394,808; 2007--\$1,803,340; 2008--\$2,021,389; 2009--\$1,279,950; 2010--\$3,739,516. For Incentive 8, the deduction amounts claimed on the returns are as follows: 2006--\$5,862,053; 2007--\$14,672,489; 2008--\$18,738,595; 2009--\$19,767,686; 2010--\$18,800,652.

<sup>3</sup> The credit was claimed on less than five returns and therefore is not disclosed to protect confidentiality.

<sup>4</sup> The credit was generally not claimed by individuals from 1981 to 2009 because of a limitation on its use. In 2009, the law was changed to remove the limitation.

<sup>1</sup> The total number of financial institution tax returns filed for each of the years reported in this table are as follows: 2011--267; 2012--255.

<sup>2</sup> Incentive 1 (highlighted in yellow) is a deduction from income, which reduces the income subject to tax. The dollar amounts shown are the estimated tax reductions, which were determined by multiplying the total deduction amounts claimed on the returns by an average tax rate. The deduction amounts claimed on the returns are as follows: 2006--\$1,880,193; 2007--\$7,335,051; 2008--\$11,898,965; 2009--\$10,153,266; 2010--\$19,504,751.

<sup>3</sup> The credit was claimed on less than five returns and therefore is not disclosed to protect confidentiality.

<sup>4</sup> The renaissance zone tax incentives--both the deduction and the credits--reduced the total financial institution tax (before deposit into the state general fund and financial institution tax distribution fund), and therefore reduced both the state general fund and the amount distributed to the counties.

	Total renaissance zone credits			Not Reportable <sup>3</sup>		Not Reportable <sup>3</sup>								
<b>Total estimated reportable tax reduction <sup>4</sup></b>					\$ 1,301,097		\$ 977,167							

**Notes to Table 3 (2011-2015 tax years):**

<sup>1</sup> The total number of financial institution tax returns filed for each of the years reported in this table are as follows: 2011--267; 2012--255.

<sup>2</sup> Incentive 1 (highlighted in yellow) is a deduction from income, which reduces the income subject to tax. The dollar amounts shown are the estimated tax reductions, which were determined by multiplying the total deduction amounts claimed on the returns by an average tax rate. The total amounts claimed on the returns are as follows: 2011--\$20,016,882; 2012--\$15,033,332.

<sup>3</sup> The credit was claimed on less than five returns and therefore is not disclosed to protect confidentiality.

<sup>4</sup> The renaissance zone tax incentives--both the deduction and the credits--reduced the total financial institution tax (before deposit into the state general fund and financial institution tax distribution fund), and therefore reduced both the state general fund and the amount distributed to the counties.

## Summary of Income and Financial Institution Tax Credit and Deduction Provisions

**TABLE 4**

This document provides a brief description of the tax credits and deductions shown in Tables 1-3.
