STATE SECURITY FREEZE LAWS

A security freeze or credit freeze is a tool available to a consumer to lock or “freeze” the consumer's credit report and credit score. When a consumer places a security freeze on his or her credit report, all third parties, such as credit lenders and other companies, whose use is not exempt under law are unable to access the consumer's credit report or credit score without the consumer's consent.

At the beginning of 2005, four states had security freeze legislation on the books. In California and Louisiana security freezes were available to all consumers. In Texas and Vermont a security freeze was available only to victims of identity theft. As of June 6, 2006, 23 states had passed security freeze legislation. Security freeze legislation was or is being considered in 2005 or 2006 in Alaska, Arizona, Delaware, Georgia, Indiana, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, and West Virginia.
