FIRST ENGROSSMENT

Sixty-fourth Legislative Assembly of North Dakota

ENGROSSED HOUSE BILL NO. 1054

Introduced by

Legislative Management

(Taxation Committee)

- 1 A BILL for an Act to amend and reenact section 57-02-27.2 of the North Dakota Century Code,
- 2 relating to assessment of agricultural property; to provide for a legislative management study;
- 3 and to provide an effective date.

4 BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

5 SECTION 1. AMENDMENT. Section 57-02-27.2 of the North Dakota Century Code is

6 amended and reenacted as follows:

7 57-02-27.2. Valuation and assessment of agricultural lands.

- 8 1. "True and full value" of agricultural lands must be their agricultural value for the
 9 purposes of sections 57-02-27, 57-02-27.1, 57-02-27.2, and 57-55-04. Agricultural
- 10 value is defined as the "capitalized average annual gross return", except for
- 11 inundatednonproductive agricultural land. The "annual gross return" must be
- determined from crop share rent, cash rent, or a combination thereof reduced by
 estimated property taxes and crop marketing expenses incurred by farmland owners
 renting their lands on a cash or crop share basis.
- 15 For purposes of this section, "annual gross return" for cropland used for growing crops 2. 16 other than sugar beets and potatoes means thirty percent of annual gross income 17 produced, "annual gross return" for cropland used for growing sugar beets and 18 potatoes means twenty percent of annual gross income produced, and "annual gross 19 return" for land used for grazing farm animals means twenty-five percent of an amount 20 determined by the department of agribusiness and applied economics of North Dakota 21 state university to represent the annual gross income potential of the land based upon 22 the animal unit carrying capacity of the land.
- 23 3. The "average annual gross return" for each county must be determined as follows:

- a. Total the annual gross returns for the ten years immediately preceding the current
 year for which data is available and discard the highest and lowest annual gross
 returns of the ten.
- 4 b. The department of agribusiness and applied economics of North Dakota state 5 university shall establish a base year index of prices paid by farmers using 6 annual statistics on that topic compiled by the national agricultural statistics 7 service for the seven-year period ending in 1995, discarding the highest and 8 lowest years' indexes, and averaging the remaining five years' indexes. The 9 department of agribusiness and applied economics shall gather the national 10 agricultural statistics service annual index of prices paid by farmers for the ten 11 years ending with the most recent year used under subdivision a, discard the 12 highest and lowest years' indexes, average the remaining eight years' indexes, 13 and divide the resulting amount by the base year index of prices paid by farmers. 14 This amount must be divided into the amount determined under subdivision a.
- 15
- c. Divide the figure arrived at in subdivision b by eight.
- 16 4. To find the "capitalized average annual gross return", the average annual gross return 17 must be capitalized by a rate that is a ten-year average of the gross agribank 18 mortgage rate of interest for North Dakota, but the rate used for capitalization under-19 this section may not be less than eight percent for taxable year 2009, seven and 20 seven-tenths percent for taxable year 2010, and seven and four-tenths percent for-21 taxable year 2011. The ten-year average must be computed from the twelve years 22 ending with the most recent year used under subdivision a of subsection 3, discarding 23 the highest and lowest years, and the. The gross agribank mortgage rate of interest for 24 each year must be determined in the manner provided in section 20.2032A-4(e)(1) of 25 the United States treasury department regulations for valuing farm real property for 26 federal estate tax purposes, except that the interest rate may not be adjusted as 27 provided in section 20.2032A-4(e)(2).
- 5. The department of agribusiness and applied economics of North Dakota state
 university shall compute annually an estimate of the average agricultural value per
 acre [.40 hectare] of agricultural lands on a statewide and on a countywide basis; shall
 compute the average agricultural value per acre [.40 hectare] for cropland, and

1 noncropland, and inundated agricultural land for each county; and shall, and provide 2 the tax commissioner with this information by December first of each year. Fifty 3 percent of the annual gross income from irrigated cropland must be considered 4 additional expense of production and may not be included in computation of the 5 average agricultural value per acre [.40 hectare] for cropland for the county as 6 determined by the department of agribusiness and applied economics. Before January 7 first of each year, the tax commissioner shall provide to each county director of tax 8 equalization these estimates of agricultural value for each county.

9 6. For purposes of this section, "inundated agricultural land" means property classified as-10 agricultural property containing The county director of tax equalization may classify 11 agricultural land as nonproductive agricultural land if it consists of a minimum of 12 tenfive contiguous acres if the value of the inundated land exceeds ten percent of the 13 average agricultural value of noncropland for the county, which is inundated to an 14 extent making it and is unsuitable for growing crops or grazing farm animals for two 15 consecutive growing seasons or more, and which produced did not produce revenue 16 from any source in the most recent prior year which is lessmore than fiftyten percent of 17 the county average revenue per acre for noncropland calculated by the department of 18 agribusiness and applied economics of North Dakota state university. Land may not be 19 classified as nonproductive agricultural land solely because it is wooded.

20 Application for classification as inundated nonproductive agricultural land for 21 property that was not so classified in the prior year must be made by the owner in 22 writing to the township assessor or county director of tax equalization by March 23 thirty-first of eachthe taxable year. If the property was not classified as nonproductive 24 agricultural land in the preceding taxable year, the assessor must confirm that the 25 property gualifies for that classification by conducting a site inspection of the property 26 and reporting the conclusion from that inspection to the county board of equalization. 27 Thelf the property was classified as nonproductive agricultural land in the preceding 28 taxable year, the owner shall thereafter furnish to the county director of tax 29 equalization, when requested to do so, any information that is believed will support the 30 claim to retain nonproductive agricultural land classification for any subsequent year. 31 Before all or part of a parcel of property may be classified as inundated nonproductive

.

	1	
1		agricultural land, the board of county commissioners board of equalization must
2		approve that classification for that property for the taxable year.
3		The agricultural value of inundatednonproductive agricultural lands for purposes
4		of this section must be determined by the department of agribusiness and applied
5		economics of North Dakota state university to be ten percent of the average
6		agricultural value of noncropland for the county as determined under this section.
7		Valuation of individual parcels of inundated agricultural land may recognize the
8		probability that the property will be suitable for agricultural production as cropland or
9		for grazing farm animals in the future.
10		 Determinations made under this subsection may be appealed through the
11		informal equalization process and formal abatement process provided for in this title.
12	7.	Before the second Wednesday in February first of each year, the county director of tax
13		equalization in each county shall provide to all assessors within the county an estimate
14		of the average agricultural value of agricultural lands within each assessment district.
15		The estimate must be based upon the average agricultural value for the county
16		adjusted by the relative values of lands within each assessment district compared to
17		the county average. In determining the relative value of lands for each assessment
18		district compared to the county average, the county director of tax equalization shall
19		use soil type and soil classification data from detailed and general soil surveys.
20	8.	Each local assessor shall determine the relative value of each assessment parcel
21		within the assessor's jurisdiction and shall determine the agricultural value of each
22		assessment parcel by adjusting the agricultural value estimate for the assessment
23		district by the relative value of the parcel. Each parcel must then be assessed
24		according to section 57-02-27. If either a local assessor or a township board of
25		equalization develops an agricultural value for the lands in its assessment district
26		differing substantially from the estimate provided by the county director of tax-
27		equalization, written evidence to support the change must be provided to the county
28	1	director of tax equalization. In determining the relative value of each assessment
29		parcel, the local assessor shall apply the following considerations, which are listed in
30		descending order of significance to the assessment determination:

1	- 0	-	
1		a.	Soil type and soil classification data from detailed or general soil surveys, using
2			guidelines established by the state supervisor of assessments for use and
3			application of the soil survey dataIt is presumed that if the soil capability class is
4			2, 3, or 4, that soil must be valued as cropland and if the soil capability class is 5,
5			6, 7, or 8, that soil must be valued as noncropland. How the property is used by
6			the owner, by itself, does not overcome this presumption.
7		b.	The schedule of modifiers that mustmay be used to adjust agricultural property
8			assessments within the county as approved by the state supervisor of
9			assessments under subsection 9 and the guidelines established by the state
10			supervisor of assessments for application of those modifiers.
11		C.	Actual use of the property for cropland or noncropland purposes by the owner of
12			the parcel.
13	9.	Mo	difiers that may be applied to an agricultural property assessment parcel are:
14		<u>a.</u>	Inaccessibility, consisting of topographic conditions making farm machinery
15			access impracticable.
16		<u>b.</u>	Nonconformity, consisting of an area of relatively higher productivity soil type
17			surrounded by nonproductive or lower productivity soil type land, making it
18			impracticable to utilize the area to its highest productive capacity.
19		<u>C.</u>	Uncharacteristic salinity, consisting of a greater degree of salinity than is
20			characteristic of the soil type where it exists, by reason of water seepage,
21			discharge, or collection.
22	<u>10.</u>	Bef	ore the second Wednesday in February first of each year, the county director of tax
23		equ	alization in each county shall provide to all assessors of agricultural property within
24		the	county instruction on how to use and apply available soil survey resources, a
25		sch	edule of modifiers that must be used to adjust agricultural property assessments
26		with	nin the county and directionsa copy of the current guidelines established by the
27		<u>stat</u>	te supervisor of assessments regarding how those modifiers must be applied by
28		ass	essors. Before the schedule of modifiers is provided to assessors within the
29		cou	inty, the county director of tax equalization shall obtain the approval of the state
30		sup	pervisor of assessments for use of the schedule within the countyModifiers may be
31		<u>app</u>	lied to reduce the soil type valuation of an area consisting of at least five

	Legislative Assembly					
1		contiguous acres of a soil type affected by conditions described for one or more of the				
2		allowable modifiers, if the assessor confirms the existence of those conditions.				
3	<u>11.</u>	An agricultural property owner may challenge any aspect of the agricultural property				
4		assessment determined for a parcel of that person's property, including the soil survey				
5		determinations, the application or nonapplication of modifiers, and the application or				
6		nonapplication of nonproductive status. The owner must present the evidence and				
7		argument supporting the challenge to the assessor or through the equalization or				
8		abatement process provided for in this title.				
9	10.<u>12.</u>	For any county that has not fully implemented use of soil type and soil classification				
10		data from detailed or general soil surveys by February first of any taxable year after				
11		2011, the tax commissioner shall direct the state treasurer to withhold five percent of				
12		that county's allocation each quarter from the state aid distribution fund under section				
13		57-39.2-26.1 beginning with the first quarter of 2013, and continuing until the tax				
14		commissioner certifies to the state treasurer that that county has fully implemented				
15		use of soil type or soil classification data. The amount withheld from the allocation				
16		must be deposited into the agricultural land valuation fund. The amount withheld from				
17		the allocation must be withheld entirely from the portion of the allocation which may be				
18		retained by the county and may not reduce allocations to any political subdivisions				
19		within the county.				
20	SEC	CTION 2. LEGISLATIVE MANAGEMENT STUDY - AGRICULTURAL PROPERTY				
21	ASSES	SMENT UNIFORMITY. During the 2015-16 interim, the legislative management shall				
22	conside	r studying the most accurate and equitable means of achieving uniformity in agricultural				
23	property	property assessments. As a basis for this determination, the committee or task force selected to				
24	conduct	conduct the study shall gather the best information available to compare and consider each				
25	county's	county's method of assessment of agricultural property, including detailed information for each				
26	county o	county on application of modifiers or other methods of adjusting valuations. The legislative				
27	management shall report its findings and recommendations, together with any legislation					
28	necessary to implement the recommendations, to the sixty-fifth legislative assembly.					
29	SECTION 3. EFFECTIVE DATE. This Act is effective for taxable years beginning after					
30	December 31, 2015.
