

FISCAL NOTE
Requested by Legislative Council
12/20/2016

Bill/Resolution No.: HB 1042

- 1 A. **State fiscal effect:** *Identify the state fiscal effect and the fiscal effect on agency appropriations compared to funding levels and appropriations anticipated under current law.*

	2015-2017 Biennium		2017-2019 Biennium		2019-2021 Biennium	
	General Fund	Other Funds	General Fund	Other Funds	General Fund	Other Funds
Revenues			\$0	\$1,532,785	\$0	\$1,862,706
Expenditures			\$(328,208)	\$1,532,785	\$(893,245)	\$1,862,706
Appropriations			\$110,916	\$1,532,785	\$122,292	\$1,862,706

- 1 B. **County, city, school district and township fiscal effect:** *Identify the fiscal effect on the appropriate political subdivision.*

	2015-2017 Biennium	2017-2019 Biennium	2019-2021 Biennium
Counties			
Cities			
School Districts			
Townships			

- 2 A. **Bill and fiscal impact summary:** *Provide a brief summary of the measure, including description of the provisions having fiscal impact (limited to 300 characters).*

Relates to medical parole, grading of offenses, sentence reduction, treatment and counseling services, access to nutrition assistance program, and creation of pretrial services program.

- B. **Fiscal impact sections:** *Identify and provide a brief description of the sections of the measure which have fiscal impact. Include any assumptions and comments relevant to the analysis.*

See attached document

3. **State fiscal effect detail:** *For information shown under state fiscal effect in 1A, please:*

- A. **Revenues:** *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

The Department of Human Services would receive \$1,532,785 of federal SNAP revenue in the 17-19 biennium and \$1,862,706 of federal SNAP revenue in the 19-21 biennium.
 See attached document.

B. Expenditures: *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

Department of Corrections and Rehabilitation: NOTE that estimated fiscal impact is determined based on estimated expenditures to provide housing, meals, and medical care for 1,973 inmates for the 2017-19 biennium and 2,247 inmates for the 2019-21 biennium. The 2017-19 estimated fiscal impact is not base on either the 2017-19 base budget or the 2017-19 executive recommendation.

2017-19 Adult Services - (\$439,124) - 100% General Funds - 3.0 New FTE

2019-21 Adult Services - (\$1,015,537) - 100% General Funds

In the 17-19 biennium the Department of Human Services would incur additional grant expenditures of \$1,643,701, of which \$110,916 would be general fund, to provide SNAP and TANF benefits to individuals convicted of a felony offense that has as an element the possession, use, or distribution of a controlled substance. For the 19-21 biennium an increase of \$1,984,998 in grant expenditures, of which \$122,292 is general fund, is anticipated.

C. Appropriations: *Explain the appropriation amounts. Provide detail, when appropriate, for each agency and fund affected. Explain the relationship between the amounts shown for expenditures and appropriations. Indicate whether the appropriation or a part of the appropriation is included in the executive budget or relates to a continuing appropriation.*

Department of Corrections and Rehabilitation - Appropriation levels in both the base budget and the executive recommendation are under funded to a greater degree than the sum of the calculated savings.

The Department of Human Services would need an appropriation increase of \$1,643,701, of which \$110,916 would be general fund, to the base level budget HB1012 and an increase of \$1,643,701, of which \$110,916 is general fund, to the executive budget recommendation HB1072 for the 17-19 biennium. For the 19-21 biennium an appropriation increase of \$1,984,998, of which \$122,292 is general fund would be needed.

To follow is analysis for the fiscal notes relating to HB 1042.

Section 1: Moves the authority to establish criteria and administer good time in correctional facilities (county) from the presiding judge of the judicial district where the facility is located to the correctional facility administrator.

No fiscal impact to the DOCR.

Per the ND Association of Counties fiscal impact to counties will be minimal.

Section 2 and 6: Sections 2 and 6 should be looked at together. Section 2 authorizes the DOCR to credit an individual sentence reduction for time spent in custody before sentencing to the legal and physical custody of the DOCR and affirms current law which does not allow for crediting time spent on probation supervision towards incarceration. Section 6 authorizes the court to award sentence reduction of up to five days per month when establishing the jail time to be credited.

Estimated fiscal impact to the DOCR for 2017-19 biennium is (\$411,267) and for 2019-21 biennium is (\$894,082). The fiscal impact assumes an average of 15 days will be credited to all new arrivals as of 7/1/16. Adoption of these sections will reduce the estimated average daily population by 6 for the 2017-19 biennium, and by 14 for the 2019-21 biennium.

Section 3: Revises the current emergency parole law to more specifically medical parole for serious or terminal medical conditions and authorizes the board to grant a medical parole for individuals subject to the mandatory armed offender law and those sentenced to life and must serve a minimum of 30 years less performance based sentence reduction. This will impact an estimated one to two individuals per year. Although the number of individuals this impacts is miniscule, there may be very high costs associated with medical care for serious medical cases and end-of-life needs as well as a humane aspect that cannot be overlooked.

Due to the variability, uncertainty, and unique circumstances surrounding the necessary medical care specific to each individual case, estimating a specific fiscal impact is impractical and could be misleading.

Section 4: Updates mandated domestic violence treatment to include an evaluation and treatment program as determined by the court.

No fiscal impact to the DOCR.

Section 5: Changes the threshold for a C felony theft of property or services stolen to exceed one thousand dollars to two thousand five hundred dollars and removes the blanket inclusion for automobiles, aircraft or other motor propelled vehicles.

If stolen, individual may still be charged as a C felony and the state would have to prove the value vehicle to be more than two thousand five hundred dollars.

Not able to estimate fiscal impact, if any, to the DOCR.

Sections 7: Reduces the penalty for ingestion of a controlled substance from an A misdemeanor to a B misdemeanor for a first offense and retains the penalty as an A misdemeanor for any second or subsequent offense.

No fiscal impact to the DOCR.

Per the ND Association of Counties fiscal impact to counties will be minimal.

Section 8: Reduces the penalty for ingestion of a controlled substance analog from an A misdemeanor to a B misdemeanor for a first offense and retains the penalty as an A misdemeanor for any second or subsequent offense. This has no financial impact on the DOCR. It may have some city and county implications because the B misdemeanor could be addressed in municipal court.

No fiscal impact to the DOCR.

Per the ND Association of Counties fiscal impact to counties will be minimal.

Section 9: Reduces possession of a controlled substance or possession of a controlled substance analog from a class C felony to a class A misdemeanor and penalty enhancement provision from one thousand feet to five hundred feet of school. It would also authorize the DOCR to release an individual from incarceration to a probation period upon the individual's successful completion of a drug and alcohol treatment program. It also clarifies manufacture, delivery and intent to deliver for purposes of offenses under this chapter.

Estimated fiscal impact to the DOCR for 2017-19 biennium is (\$427,489) and for 2019-21 biennium is (\$500,169). Adoption of this section will reduce the estimated average daily population by 8 for the 2017-19 biennium, and by 9 for the 2019-21 biennium.

Section 10: Reduces the distance for penalty enhancement for manufacture, delivery or possession with intent to manufacture or deliver a controlled substance from one thousand feet to five hundred feet of a child care or preschool facility, elementary or secondary school or colleges.

No fiscal impact to the DOCR.

Section 11: Reduces possession of drug paraphernalia from a C felony to an A misdemeanor and marijuana paraphernalia from an A misdemeanor to a B misdemeanor. This may impact the DOCR in two ways. First, individuals convicted of a C felony drug paraphernalia are eligible for up to three years of supervised probation on initial sentence and up to a total of five years upon revocation. Individuals convicted of an A misdemeanor are eligible for up to two years of supervised probation and up to a total of three years upon revocation. This would reduce the eligible time for supervision upon initial sentence and by revocation by one year each. It would also reduce the maximum incarceration penalty from five years to one year. This change may also reduce impact on states attorneys, indigent defense counsel, jails and the courts. Misdemeanor offenses can have bail set by a bond schedule rather than having to make an appearance before the court, preliminary hearings are not required and indigent defense counsel may not be necessary if incarceration is not being considered as part of the sentence. Any fiscal implications to the aforementioned groups would have to be addressed by them.

Estimated fiscal impact to the DOCR for 2017-19 biennium is (\$156,816) and for 2019-21 biennium is (\$177,735). Adoption of this section will reduce the estimated average daily population by 3 for the 2017-19 biennium, and by 3 for the 2019-21 biennium.

Section 12: This section will allow the court to terminate probation when the individual completes a drug court program. This change is driven by the current DUI law which mandates a penalty of a minimum amount of time for supervised probation in the case of an A misdemeanor of one year and two years for a C felony.

No fiscal impact to the DOCR.

Section 13: Authorizes the expansion of the pool of qualified people to provide addiction treatment services in North Dakota according to qualifications expanded by various licensing boards.

No fiscal impact to the DOCR.

Section 14: Per the ND Department of Human Services:

Estimated fiscal impact of \$1,532,785, of which all is federal funds, due to the Department of Human Services not denying SNAP benefits to those who have been convicted of a felony offense that has as an element the possession, use, or distribution of a controlled substance. It is estimated for the 17-19 biennium approximately 450 additional individuals would receive SNAP benefits each month. The estimated individuals for the 19-21 biennium is approximately 496 at an estimated cost of \$1,862,706, of which all would be federal funds.

Section 15: Per the ND Department of Human Services:

Estimated fiscal impact of \$110,916, of which all is general fund, due to the Department of Human Services not denying TANF benefits to those who have been convicted of a felony offense that has as an element the possession, use, or distribution of a controlled substance. It is estimated for the 17-19 biennium approximately 20 additional individuals would receive TANF benefits each month. The estimated individuals for the 19-21 biennium is approximately 22 at an estimated cost of \$122,292, of which all would be general fund.

Section 16: Authorizes a pretrial services project that may reduce the number of people held in jail on bond; thereby, freeing up limited jail space and allowing the DOCR to supervise people on pretrial in the community.

Estimated fiscal impact to the DOCR is dependent upon the population of the county selected for the pretrial services pilot project. For this estimate it is assumed that the DOCR would implement the pilot project in one of the higher populated counties and 3 new FTE's would be required.

Salary and Fringe -	\$504,606 (\$4,626 per FTE per month salary plus fringe)
Operating -	<u>51,843</u> (\$17,281 per FTE)
Total -	\$556,449
