- 2 A. **Bill and fiscal impact summary:** *Provide a brief summary of the measure, including description of the provisions having fiscal impact (limited to 300 characters).*

HB 1388 establishes the policy for implementing the K-12 funding formula.

- B. **Fiscal impact sections:** *Identify and provide a brief description of the sections of the measure which have fiscal impact. Include any assumptions and comments relevant to the analysis.*

Section 11 adjusts the small school weighting factors for districts with less than 245 students. Section 11 also establishes incremental increases to these weighting factors until the 2027-28 school year. School districts that do not operate a high school will have their average daily membership divided by .6 to impute an average daily membership to be on the same scale as high school district.

Section 12 provides a 1% and 1% increase to the per pupil payment of \$10,036 per student. The transition maximum districts receive a 5% and 5% increase as well as an adjustment of 15% of the difference of their transition calculation and the formula calculation for 2021-22 and 30% of the difference for 2022-23. This will increase 15% each year until the transition maximum adjustment is 0.

3. **State fiscal effect detail:** *For information shown under state fiscal effect in 1A, please:*

- A. **Revenues:** *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

- B. **Expenditures:** *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

The cost to continue the funding formula into the next biennium would result in a decrease in appropriation of \$16,868,441. This is as result of lower than anticipated enrollments due to the pandemic and enrollment effects from changes in the energy industry.

The 1% and 1% increase costs \$34.3 million

The 5% increases to the transition maximum districts costs approximately \$5.7 million

The 15% adjustment each year would cost approximately \$3.4 million

The increases and changes to the small school weighting factors would increase the appropriation \$7.6 million.

- C. **Appropriations:** *Explain the appropriation amounts. Provide detail, when appropriate, for each agency and fund affected. Explain the relationship between the amounts shown for expenditures and appropriations. Indicate whether the appropriation or a part of the appropriation is included in the executive budget or relates to a continuing appropriation.*

The appropriation for HB 1388 is in the Integrated Formula Payments line in HB 1013. Due to the projected decrease in funds needed to continue the funding formula into the next biennium, the appropriation needed would be an additional \$34,147,572.

Section 16 establishes an appropriation of \$260,000 for the K-12 coordinating council.

Section 17 appropriates money from the foundation aid stabilization fund of \$34,300,000.
