22           **16.1-06-12. Definitions.**

23           ~~As used in this title with regard to electronic voting systems~~For purposes of this title, unless  
24 the context otherwise requires:

25           1. "Automatic tabulating equipment" means an apparatus which automatically tabulates  
26 and counts votes recorded on ballots or entered directly into a computer or other  
27 electronic device by means of a touchscreen or other data entry device and data  
28 processing machines which can be used for counting votes and tabulating results.  
29           2. "Ballot" means a handcount paper ballot ~~or for an electronic voting system includes a~~  
30 ~~tabulating paper ballot~~, recorded by optical scan reader, containing the names of  
31 offices and candidates and the questions to be voted on, ~~which is used in conjunction~~

1           with the marking device and on which votes may be recorded. For direct recording-  
2           electronic voting systems, ballot means the ballot display provided by electro-optical-  
3           devices showing the names and candidates and the questions to be voted on that  
4           allows a voter to directly enter choices into electronic storage with the use of a  
5           touchscreen or other data entry device.

7           the automatic tabulating and counting of ballots.

8           4. "Direct recording electronic voting system" means a voting system that records votes  
9           by means of a ballot display provided by electro-optical devices that allows a voter to  
10          directly enter choices into electronic storage with the use of a touchscreen or other

12          facilitate voting for write-in candidates. A voter's choices are stored in the  
13          direct recording electronic voting system's internal memory devices and added to the  
14          choices of all other voters.

15          5. "Electronic voting system" means a system, or the combination of electronic voting  
16          systems and devices authorized under this chapter, that may employ a marking device

2 **election and after tabulation of ballots.**

- 3           1. All electronic votingcounting systems used in this state must be tested according to  
4 guidelines established by the secretary of state and as follows to ascertain whether  
5 the automatic tabulating equipment will accurately count the votes cast for all offices  
6 and measures. The testing must be conducted prior to each election at which the  
7 system will be used. The testing must be done by the county auditor or county  
8 auditor's designee, and after each test, the testing materials and any preaudited  
9 ballots used during the test must be sealed and retained in the same manner as  
10 election materials after an election.
- 11           2. The test of an electronic votingcounting system ~~employing paper ballots~~ must be  
12 conducted by processing a preaudited group of ballots on which are recorded a  
13 predetermined number of valid votes for each candidate and measure and must  
14 include for each office one or more ballots which have votes in excess of the number  
15 allowed by law in order to test the ability of the automatic tabulating equipment to  
16 reject such votes. During the test a different number of valid votes must be assigned to  
17 each candidate for an office and for and against each measure. If an error is detected,  
18 the cause of it must be ascertained and corrected, and an errorless count must be  
19 secured and filed as provided in this section.
- 20           3. The test must be conducted at least one week before the election. One week before  
21 the test is conducted, the county auditor must send the district chairman of each  
22 political party having a candidate on the ballot a notice of the test. The notice must  
23 state the time, place, and date of the test or tests and that the district chairman or  
24 district chairman's designee may attend.
- 25           4. At the conclusion of the test, the programming for each electronic votingcounting  
26 device must be sealed within the device with a unique numbered seal that must be  
27 verified by the election inspector before the opening of the polls to make sure the  
28 programming has not been removed from the device.
- 29           5. After each election, the secretary of state shall order a random testing of the  
30 votingcounting system programming for one precinct in each county of the state  
31 according to logic and accuracy testing procedures detailed in subsection 2 and as

14           electronic counting machines must comply.

15           2. b. Describe the procedures for ~~electronic voting systems and~~ electronic counting  
16           machines, any single device of an ~~electronic voting system and~~ electronic

1 machine, a single device of an ~~electronic voting system~~ and electronic counting  
2 machine, and an update and enhancement made to ~~them~~ an electronic counting  
3 machine, that meets meeting the requirements of the rules by ~~January 1, 2006~~.

19 Sample ballots used for publication purposes must be arranged using the rotation of the  
20 ballot in the precinct in the county which cast the highest total vote for governor at the last  
21 general election at which the office of governor was filled. In the event that this determination is  
22 no longer possible due to changes in precinct boundaries, the precincts are to be ordered  
23 according to the precincts with the greatest voting age population to the least. This information  
24 is to be provided by the North Dakota state data center or based on the best available data as  
25 determined by the county auditor. On the official ballot used at the election, ~~including electronic-~~  
26 ~~voting system ballots~~, the names of candidates beside or under headings designating each  
27 office to be voted for must be alternated in the following manner:

31 under the provisions of this section must be alternated by an algorithm approved by

- 1 the secretary of state designed to ensure to the extent possible that each name on the  
2 ballot for an office is listed in each position order on an equal number of precinct  
3 ballots spread across the county. There must be a different alternation sequence for  
4 each of the following, based on the geographical area by which the office is filled:
- 5 a. Offices to be filled by the electors of the state, the entire county, or any district  
6 which includes the entire county.
  - 7 b. Offices to be filled by the electors of districts smaller than the county, with a  
8 different rotation for each of those districts.
- 9 2. Although the names are to be alternated within the offices on the ballot, the name  
10 order for an office is to be the same for all ballots within a precinct.

21 generate the canvass report from the electronic voting counting system. The ballots counted by  
22 the machine must be equal in number with the names on the poll clerks' lists. If the numbers are  
23 not equal, the pollbooks are to be rechecked to find the discrepancy. The canvass shall  
24 continue without adjournment until completed and must be open to the public. Except in  
25 unusual and compelling circumstances, the canvass shall occur at the polling place. If good and  
26 substantial reasons exist for the removal of the ballots and election records to another location  
27 for canvass, the other location must be in the same precinct and the removal must be approved  
28 by the election board. In no case may the ballots be removed to another location prior to  
29 generating the canvass report after the ballot boxes have been opened. Upon approval of a

12 section 16.1-11.1-06, if the work of the election board is completed prior to close of the polls on  
13 election day, the election board shall create and sign a statement consisting of a reconciliation  
14 of the number of voters recorded in the pollbook and the number of ballots processed through  
15 the tabulators. The voting system must be secured in a manner prescribed by the county auditor  
16 that will protect the system and ballots from tampering. Prior to generating the canvass report  
17 from one of these three types of precincts, an election judge representing each political party, or
