Senate Bill No. 2243 (2013) provided for a study of behavioral health needs. The study was to include consideration of behavioral health needs of youth and adults and consideration of access, availability, and delivery of services. The study was to include input from stakeholders, including representatives of law enforcement, social and clinical service providers, education, medical providers, mental health advocacy organizations, emergency medical service providers, juvenile court, tribal government, and state and local agencies and institutions. The study was assigned to the interim Human Services Committee.

The committee received information regarding the Department of Human Services Division of Mental Health and Substance Abuse Services, the State Hospital, Human Service Centers, the Life Skills and Transition Center, and the Department of Corrections and Rehabilitation Division of Adult Services and Division of Juvenile Services. Information was also received from interested persons and the Behavioral Health Stakeholders Group regarding behavioral health needs in North Dakota.

The Legislative Council issued a request for proposal for consultant services for assistance in a study of behavioral health needs of youth and adults in North Dakota. The committee selected and contracted with Ms. Renee Schulte, Schulte Consulting, LLC, Iowa, to conduct the study. The contract cost was \$44,000.

Goals and recommendations identified by the consultant related to service shortages, expanding workforce, changing insurance coverage, changing the structure and responsibilities of the Department of Human Services, improving communication, and expanding data collection and research. The consultant also recommended North Dakota further investigate and review transportation, judicial matters, definitions of services, tribal partnerships, and advocate training.

Recommendations related to behavioral health professional workforce and training included:

1. Expand the behavioral health workforce by improving oversight for licensing issues and concerns and increasing the use of laypersons to expand treatment options.
2. Establish professional licensing board standards to allow:
 - a. One year of practice if licensed in another state;
 - b. A process for meeting North Dakota licensing standards during the 1-year period;
 - c. Reciprocity of licenses between Montana, South Dakota, and Minnesota; and
 - d. A method for issuing licenses within 30 days.
3. Expand the number of licensed addiction counselors by establishing a stipend program for licensed addiction counseling interns that would be forgiven if the licensed addiction counselor practices in the state for 4 years.
4. Expand the number of licensed addiction counselor training slots by providing stipends for organizations that offer the training.
5. Establish a student loan buydown program for licensed behavioral health clinical staff. **This was approved by the 2015 Legislative Assembly in House Bill No. 1049 and codified as Section 43-45-05.4.**

2015-16 Interim - Reports of Behavioral Health-Related Boards

The 2015-16 interim Health Services Committee reviewed the 2013-14 interim Human Services Committee report on a study of behavioral health needs. Pursuant to House Bill No. 1048 (2015), the committee received a consolidated report from the Board of Addiction Counseling Examiners, Board of Counselor Examiners, North Dakota Board of Social Work Examiners, North Dakota Marriage and Family Therapy Licensure Board, State Board of Psychologist Examiners, and the North Dakota Board of Medicine. The boards agreed North Dakota should match national standards to allow for professional mobility and that minimal statutory changes would be needed to align state standards with national occupation-specific standards. The boards reported workforce-related issues are not due to regulatory barriers or board inefficiencies and the boards have no authority over employment standards or insurance reimbursement requirements.

Pursuant to House Bill No. 1049 (2015), the committee received a report from the Board of Addiction Counseling Examiners. The board provided a summary of recent changes, including the addition of a new training consortium, regular review of licensure requirements, streamlined applications, flexible consortium training start dates, and collaboration to allow for a national certification in addiction counseling. The board also proposed:

1. Changes related to tiered licensure levels, academic requirements, clinical training, and reciprocity.
2. A four-tier system of certification and the "career ladder" would allow the board to provide out-of-state professionals credentialing while they complete their academic and clinical training requirements.
3. Removing certain academic requirements, the completion of which is implied by other coursework.
4. Reducing clinical training hours.
5. Changes to reciprocity rules, including plans to prorate clinical hours for reciprocity.

The committee recommended Senate Bill No. 2033 (2017) to provide for clinical supervision of behavioral health professionals by behavioral health professionals outside of their respective professions.

2017-18 Interim - Report from Behavioral Health Professional Boards

Senate Bill No. 2033 (2017) provided that a portion of the supervised experience to qualify for licensure as a clinical social worker, counselor, or marriage and family therapist may be provided by a licensed behavioral health professional other than the profession being licensed. The bill allowed an applicant for licensure as a clinical social worker to meet the supervised experience requirement through experience in the practice of clinical social work and allowed the Board of Social Work Examiners additional flexibility in accepting licensure from other jurisdictions. Section 5 of the bill required the North Dakota Board of Social Work Examiners, Board of Addiction Counseling Examiners, Board of Counselor Examiners, and North Dakota Marriage and Family Therapy Licensure Board to provide a report to the Legislative Management regarding the status of implementing these changes. The interim Health Services Committee was assigned the responsibility to receive this report.

State Board of Psychologist Examiners

The committee received information from the State Board of Psychologist Examiners. The board proposed the following administrative changes:

1. Adding operational data to expedite licensure permitting the board to allow qualified applicants licensed or certified outside the state to practice while waiting for completion of licensure in this state;
2. Allowing the Professional Responsibility Examinations to be administered in written form;
3. Easing the process to obtain approval for continuing education sponsors;
4. Clarifying the relationship with the Educational Standards and Practices Board regarding school psychologists;
5. Clarifying board membership requirements for nonpractitioner members and allowing applied behavior analysts to be eligible for serving on the board; and
6. Adding supervision changes that align qualifications of those receiving training with the work credentials of the mentor.

Board of Addiction Counseling Examiners

The committee received information from the Board of Addiction Counseling Examiners. The board collaborated with the Board of Counselor Examiners and the North Dakota Board of Social Work Examiners to review and encourage dual licensure. The board proposed Administrative Code changes to allow a National Association of Addiction Professionals National Certified Addiction Counselor Level II certification or a Master Addiction Counselor certification to become licensed and accepted immediately without an academic or clinical training review. Any applicant with a verifiable license or certification in good standing from another jurisdiction may be accepted immediately as an intern until the academic and clinical training reviews or any other outstanding items are complete. The committee was informed any advanced practice professionals established in Senate Bill No. 2042 (2017), including medical doctors, psychologists, advanced practice registered nurses, and physician assistants, will not have the academic requirements, but may have minimal clinical training requirements to become licensed. Other advanced practice professionals, including licensed independent clinical workers, licensed professional clinical counselors, and licensed marriage and family counselors may be licensed with minimal training requirements.

Board of Counselor Examiners

The committee received information from the Board of Counselor Examiners which indicated the board was reviewing its process and anticipated proposing Administrative Code changes.

North Dakota Board of Social Work Examiners

The committee received information from the Board of Social Work Examiners. Senate Bill No. 2033 modified the standard under which applicants for clinical social work obtain the necessary 3,000 hours of supervised experience. The second 1,500 hours of the 3,000 hours now can be obtained under the supervision of licensed professionals other than a licensed independent clinical social worker if geographic or other factors make the modification reasonable. The bill also created an alternative way of receiving licensure by reciprocity. The board may grant a license even if the laws of the two states are not substantially similar if the applicant is licensed in good standing under the laws of another jurisdiction and possesses qualifications or experience in the practice of social work which are substantially similar to the minimum requirements for licensure in this state. The testimony indicated the board streamlined licensing procedures. A license may be issued in 2 to 4 weeks if an applicant submits all required information and meets all of the criteria. The board also authorized two of its board members to approve initial licenses and master of social work supervision plans if no further issues need to be discussed. Issues may include background checks, mental health history, whether applicant is in good standing, or if clinical work does not

meet criteria. The committee was informed the challenge with social work licensure is that states use different social worker titles and each title has different licensing requirements.

North Dakota Marriage and Family Therapy Licensure Board

The committee received information from the North Dakota Marriage and Family Therapy Licensure Board which indicated the state's licensure standards for marriage and family therapists are similar to the licensure standards of other states; therefore, there are no impediments preventing individuals licensed in other states from becoming licensed in North Dakota nor preventing individuals receiving an education in a different state from becoming licensed in North Dakota.

STUDY PLAN

The following is a proposed study plan for the committee's consideration in its study regarding occupational boards that address mental health and behavioral health issues:

1. Receive and review information from representatives of the State Board of Psychologist Examiners, Board of Addiction Counseling Examiners, Board of Counselor Examiners, Education Standards and Practices Board, North Dakota Board of Social Work Examiners, and North Dakota Marriage and Family Therapy Licensure Board regarding:
 - a. Mental health and behavioral health services provided by licensees under direction from the board;
 - b. Rules adopted by the board and the frequency of rule review;
 - c. Requirements to be licensed by the board;
 - d. History and trends of foreign practitioners and any additional licensure requirements;
 - e. Fees charged by the board;
 - f. Training requirements for board members and executive directors;
 - g. Average duration of board membership and executive director employment.
2. Receive and review information from interested persons regarding the committee's study of occupational boards that address mental health and behavioral health issues.
3. Develop recommendations and any bill drafts necessary to implement the recommendations.
4. Prepare a final report for submission to the Legislative Management.
